

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

SCHOOL FESTIVAL SONGS.

A COLLECTION OF

*Favorite English and German Trios and Choruses for Male or Female Voices,
with Piano Accompaniment.*

SUITABLE FOR

EXHIBITIONS, COMMENCEMENTS, CONCERTS AND PARLOR ENTERTAINMENTS.

Bound in Paper Covers, - - - 75 cts.

Bound in Boards - - - \$1.00.

J. Fischer & Bro., 226 E. Fourth St., New York.

This seasonable book contains twenty-four choice School Festival Songs, by such composers as Abt, Karl Merz, F. C. Meyer, Mueller and others. It meets a want long felt for music for such occasions as demand appropriate selections to make school exhibitions enjoyable.

NATIONAL JOURNAL OF EDUCATION.

This book is a gem by popular authors, and should be found in the hands of every teacher of vocal classes throughout the country. It is issued in a convenient form, in large, clear type, carefully arranged; and the enterprising publishers, Messrs. J. Fischer & Bro., 226 E. Fourth St., New York, will doubtless find ready and remunerative sale for this excellent little work. Price, only 75 cents.

NEW YORK SCHOOL JOURNAL.

SCHOOL FESTIVAL SONGS. J. Fischer & Bro., 226 E. Fourth St., New York.

This is an excellent collection of favorite English and German trios and choruses, for male and female voices, with piano accompaniment, suitable for exhibitions, commencements, concerts and parlor entertainments. The names of Abt, Merz, Winter, Weber and others, as composers, show the high musical standard of the different selections, and from the sixty-five pages—half-sheet music size—we can assure any one of musical ability, something for his especial delectation. For the annual exhibitions of grammar or high schools, the solos or choruses are admirable.

FISCHER'S PRACTICAL ORGANIST

A COLLECTION OF

*Preludes, Interludes, Postludes and Modulations, Adapted to the
Wants of Young Organists.*

Embracing selections from the works of KOERNER, RINK, OBERHOFFER, TOEPFER, FUEHRER, RITTER, GEBHARDI, WEDEMANN, STRUBE, and other great masters.

Compiled by Joseph Fischer, Organist at the Church of the Most Holy Redeemer, New York.

2 Volumes, - - - - - Each \$1.50.

THE YOUNG MUSICIAN LAUGHING CHORUS.

Ich bin ein Musikant.

Designed for Juvenile Classes.

The executants stand in a semi-circle, and while singing, they imitate the actions of the various instruments, repeating each time all those that have preceded.

Volkslied, arranged by F. W. Rosier.

Price - - - - - 30 Cents.

LITTLE WILD BIRDS,

(Das Waldböglein.)

For 2 or 4 voices, with Piano Accompaniment.
Arranged by E. J. Biederman.

Price - - - - - 30 Cents.

A very popular piece for Exhibitions, Concerts and parlor entertainments. An easy orchestra arrangement for this charming song can be had by applying to the publishers.

(Each Chor.)

For Three or Four Voices,

(Base ad libitum)

With Piano and Cornet Accompaniment.

(The latter not obligato) or with

Orchestra Accompaniment.

Composed by

FERDINAND SCHALLER.

Price 25 Cts.

Cornet Part 10 Cts.

Orchestral Parts 60 Cts.

RECENTLY PUBLISHED

Houston's Easy Lessons in Natural Philosophy.

Houston's Intermediate Lessons in Natural Philosophy.

Houston's Elements of Natural Philosophy.

THE EASY LESSONS IN NATURAL PHILOSOPHY is intended for children. It is arranged on the "question and answer" plan, but the answers, in almost every case, contain in themselves a distinct statement apart from the question, thus removing the objections of those who are opponents of the "question and answer" plan of teaching, which, if *properly* used, is shown by experience to be one of the best methods of reaching the mind of a young child.

THE INTERMEDIATE LESSONS is designed for the use of pupils who have finished such books as Houston's "Easy Lessons in Natural Philosophy," Martindale's "First Lessons in Natural Philosophy," Swift's "First Lessons in Natural Philosophy," Hotze's "First Lessons in Physics," Parker's "Natural Philosophy," Part I., Peterson's "Familiar Science," and other similar books, but who are not sufficiently advanced to take up the larger text-books. Its publication was determined upon at the request of teachers who felt the need of a book of this grade to meet the wants of their own classes. There is no other book in the market which fills the want here indicated.

THE ELEMENTS OF NATURAL PHILOSOPHY is intended for Graded Schools, Academies, Seminaries, Normal Schools, etc. It gives the elements of the science in a concise form, and in logical sequence, so that the book forms a *system* of Natural Philosophy, and not a mere collection of disconnected facts. It is fully "up to the times" in every respect, and gives full descriptions of the more important discoveries lately made in Physical Science. The Electric Light, the Telephone, the Microphone, the Phonograph, etc., are all described and illustrated. An examination of the work will show that no expense has been spared to bring it up to the highest standard as regards illustration and typography.

Christian Ethics; or The Science of the Life of Human Duty.

A New Text-Book on Moral Science. By Rev. D. S. Gregory, D.D., President of Lake Forest University, Illinois. Price \$1.50.

Practical Logic; or The Art of Thinking.

By Rev. D. S. Gregory, D.D. This is the best Text-Book on the subject that has yet been published. Price \$1.15.

The Model Roll-book, No. 1, and The Model Roll-Book, No. 2.

PRICE \$1.50 EACH.

The Model Roll-Book, No. 1, is so ruled as to show at a glance the record of a class for three months, allowing five weeks to each month, with spacing for weekly, monthly and quarterly summary, and a blank space for remarks at the end of the quarter.

The Model Roll-Book, No. 2, is arranged on the same general plan, as regards spacing, etc., excepting that each page is arranged for a month of five weeks, but, in addition, the names of the studies generally pursued in schools are printed immediately following the name of the pupil, making it more convenient when it is desirable to have a record of all the studies pursued by a pupil brought together in one place.

Specimen pages of both books will be sent on application.

A BOOK WITHOUT A RIVAL.

HOUSTON'S PHYSICAL GEOGRAPHY.

This is just such a work on the subject as has long been needed, and its publication supplies a long-felt want in schools of all grades. Especial pains have been taken, and no expense spared, to bring up every feature to the highest possible standard of excellence. With the design of rendering the book peculiarly adapted for the class-room, new features have been introduced, the importance and utility of which will be appreciated by teachers. The Syllabus at the end of each chapter is a feature which will especially commend itself to teachers. The work has grown out of the wants of the author in the school-room, and presents the labor of years in this branch of study. With this book the subject can be mastered in less time than with any other text-book heretofore published. Price, \$1.50.

WE CALL ATTENTION TO THE FOLLOWING PARTICULARS:

1. The Syllabus at the end of each Chapter.
2. Accuracy and Clearness of Statement.
3. Convenience of Shape and Size.
4. Adaptability to Use in the School-Room.
5. Accuracy and Beauty of Illustrations and Typography.
6. The quality of the Paper.
7. The Handsome and Durable Style of Binding.
8. Its Reasonable Price.

THE MODEL WORD-BOOK SERIES.

New Editions, Revised and Enlarged.

Teachers who have for years been using the old editions of Model Word-Books will learn with pleasure that we have issued new, revised and enlarged editions of the two books formerly constituting the series, and that the series has been extended by the addition of a third book.

1. The Model Definer. Price, 40 cents.

2. The Model Etymology. Price, 65 cents.

3. A Manual of Etymology. Price, \$1.00.

The plan of the *Model Definer* has been entirely changed. It is now a book in two parts. Part I contains about 1,000 words, such as a child finds in the elementary reading books, or hears in everyday conversation. These words are defined, and, in most cases, a *sentence* is given showing the proper use of the word. Part II shows the derivation and analysis of the words, thus leading naturally and easily to the study of words as found in the *Model Etymology*. The third book of the series is the same, word for word, up to page 225, as the *Model Etymology*, but contains about 64 pages of additional matter, giving the words derived from the Greek. Teachers will do well to examine these books.

MANUALS FOR TEACHERS.

No. 1. The Cultivation of the Senses. 50 cts.

No. 2. The Cultivation of the Memory. 50 cts.

No. 3. On the Use of Words. 50 cts.

No. 4. On Discipline. 50 cts.

No. 5. On Class Teaching. 50 cts.

These manuals are worthy of the attention of Teachers and all others interested in the education of the young. They are sent only on receipt of price, as given above.

THE TEACHER.

A Monthly Educational Journal, devoted to the interest of Teachers, Schools, and the cause of Education in general. Price, 50 cents per annum. Specimen copy sent free.

We shall be gratified to have teachers correspond with us. We offer some of the best of Modern Text-Books, and shall be glad at any time to make liberal arrangements for the introduction of our books, or to exchange for others that do not give satisfaction.

ELDREDGE & BRO.,

17 North Seventh Street, Philadelphia.

1848. THE INDEPENDENT. 1883.

The Largest, The Ablest, and the Freshest Religious
and Literary Weekly.

"The foremost religious newspaper of the United States," is what Joseph Cook, the brilliant Boston lecturer, calls THE INDEPENDENT, and both the religious and secular press concede this superiority. They say that it is "The best religious periodical in the world;" "A marvel among newspapers;" that it has "An incomparable corps of writers;" and that "No other paper in the country has a tithe of its intellectual resources."

It is not sectarian or denominational. It is an evangelical, religious journal. It secures the best of contributions from the best writers in all denominations and expresses its own opinions plainly and frankly.

Its literary features are very attractive. Its poems are from the best poetical writers. Its stories and descriptive articles are by the most eminent authors. Its department of Literature is especially valuable for its fullness. All the publications of the day are critically reviewed and the opinions expressed are able, unbiased and frank.

It neglects no department of human knowledge. Its special and editorial departments are numerous, comprehensive and accurate. Among them are Biblical Research, Missions, Religious Intelligence, the Sunday-School, Music, Hymn Notes, Education, Science, Sanitary, Fine Arts, Ministerial Register, Personalities, Farm and Garden, Financial and Commercial. Thirty-two pages in all every week.

We will report in full Rev. Joseph Cook's celebrated Boston Monday Lectures, which will begin in January. Mr. Cook has just returned from a two years' trip round the world, and his lectures this winter will attract greater attention than ever.

Read some of the names of its regular contributors:

NOAH PORTER, D.D., LL.D., President of Yale College.

In extent and character of its circulation, it cannot be duplicated.

GIVE IT A TRIAL.

SCHOOLS FOR TEACHERS

AND

TEACHERS FOR SCHOOLS.

Teachers have neither the time nor the facilities for seeking the best positions they are qualified to fill, and it is very frequent that successful teachers and those who, at great expense, have prepared themselves to teach, cannot obtain schools at any salary. In 1874 we established in Chicago

THE WESTERN BUREAU OF EDUCATION

for the purpose of obtaining schools for teachers. Persons upon whom rested the responsibility of employing teachers at once saw the advantages of such an agency, and by thorough and systematic work, going over the same field year after year, we have established a confidence among school officers in all grades of schools. Some schools have employed through us as many as five teachers in one year. Through the agents and subscribers of *THE PRACTICAL TEACHER* we learn of vacancies long before any one else can obtain such information, and during the past two years we have employed on salary a traveling agent for our educational publications and to obtain information for the Bureau. Thus it will be seen our facilities for successful work are constantly increasing.

CIRCULARS AND FULL INFORMATION FREE.

School and College officers are requested to correspond with us in regard to supplying any vacancies that may exist in their corps of teachers. Address

W. L. KLEIN & CO., Chicago.

THE PRACTICAL TEACHER

Ranks by general consent first among the educational journals of the land. It is published semi-monthly, and is devoted to the practical work of the school-room. Its editorials are clear, sharp and vigorous, and cannot be but helpful to any teacher. It is national in its character, and therefore its pages are not filled with local matter, reports of committees, etc.

The School Department always contains one or more of a series of articles for the daily practical work of the school-room. Volume six will contain an article on teaching United States History by the Brace system, Language Lessons for Primary and Intermediate Pupils, articles on Drawing, Spelling, Reading, Geography, Music, Discipline, School Government, etc.

The Friday Afternoon Department contains pieces for declamation suitable for all grades of schools, dialogues for the little folks, songs, parlor recreations, etc. This department alone is worth the price of the paper.

The Miscellaneous Department contains a variety of useful reading matter for the teacher at home, or to be read to or by the pupils as variety in the work of the school-room. Teachers and pupils can gain much information from this department. Children like variety, and nowhere can there be found so many valuable expedients as in *THE PRACTICAL TEACHER*.

Published Semi-Monthly, \$1.25 per year. Specimen Copies Free.

ONE THOUSAND WAYS OF ONE THOUSAND TEACHERS.

THE LEADING EDUCATIONAL WORK OF THE DAY.

This book has won its way into general favor by its originality of design and its practical character. The leading educators of the country have contributed to its pages, and we feel safe in saying that nowhere else can so much valuable educational matter be found. It is a book for every teacher who wishes to know

THE HOW AND THE WHY

of all work done in the school-room. It covers the entire field, as may be seen by the

TABLE OF CONTENTS.

Chapter I.—Opening and Closing of School. Chapter II.—Reading. Chapter III.—Arithmetic. Chapter IV.—Writing. Chapter V.—Spelling. Chapter VI.—Grammar. Chapter VII.—Geography. Chapter VIII.—History. Chapter IX.—Discipline and School Management. Chapter X.—Absence and Tardiness. Chapter XI.—Sayings of Experienced Educators. Chapter XII.—Forms.

Price, post paid.....\$1 50

HOW TO TEACH ARITHMETIC

Is taught in PROF. COOK'S Methods in WRITTEN ARITHMETIC, with its Discussion and Explanation of Principles, Suggestions, Methods of Solution, Forms of Analysis, Etc., Etc.

The value of this work by Prof. John W. Cook, of the Illinois Normal University, is attested by the many favorable notices from teachers in all parts of the country.

As a teacher of Mathematics, Prof. Cook has no superior in the country, and his treatment of this subject shows that he understands the wants of teachers.

Price, post paid.....75 cents.

Descriptive circulars of the above and many other valuable educational works, will be sent upon request. Address

W. L. KLEIN & CO., Chicago or Minneapolis.

.....
COLLEGIATE INSTITUTE

H. P. DAVIDSON, A.M., PRINCIPAL.

SALEM, NEW JERSEY

COLLEGIATE INSTITUTE

AND

BUSINESS COLLEGE,

SALEM, NEW JERSEY.

Organized 1867; private; Faculty 6; course: Academic 4 years, Commercial, Normal and Classical each 3 years; library 300 volumes; tuition \$30 to \$50; board \$5; board and tuition, \$240 per annum; 60 students; value of apparatus \$300; value of grounds and buildings \$15,000.

The sixteenth year of this Institute began Tuesday, September 12, 1882. Students thoroughly fitted for business, teaching or college. H. P. Davidson, A.M., Principal.

We have the pleasure of referring, by permission, to the following college presidents, professors and others, as well as to the scores of former students, now holding honorable and lucrative positions, all of whom have had the opportunity of knowing the merits of the Collegiate Institute:

| | |
|---|---|
| Pres. J. McCosh, D.D., Princeton College; | Pres. W. C. Cattell, D.D., Lafayette College; |
| Pres. J. H. Seelye, D.D., Amherst College; | Prof. A. W. Phillips, Yale College; |
| Prof. Mark Bailey, Yale College; | Hon. E. A. Appgar, State Superintendent, N. J.; |
| Hon. Cyrus H. Baldwin, Columbia, S. C.; | Rev. F. R. Brace, Supt., Camden County, N. J.; |
| E. M. Hunt, M.D., Sec. State Board of Health; | Henry Holmes, Supt. Salem County, N. J.; |
| M. H. Stratton, Esq., State Board of Education; | Rev. Wm. N. Bannard, D.D., Salem, N. J. |

TESTIMONIALS.

Prof. H. P. Davidson, of Collegiate Institute, Salem, New Jersey, is sending to this College good and well trained students.

From Rev. James McCosh, D.D., President of Princeton College.

I have for many years been acquainted with Mr. H. P. Davidson, Principal of Collegiate Institute, at Salem, New Jersey, and from my knowledge of his character and abilities, I should have great confidence in him as an instructor of youth. We have had, at this Institution, the best evidence of his superior abilities as a teacher in the young men whom he has prepared to enter our classes. These have given evidence of careful and thorough training, and I can, therefore, with additional confidence, commend him and his school to the confidence and patronage of the public.

From Rev. W. C. Cattell, D.D., President of Lafayette College.

"No system of education in a State is complete which is composed of public schools alone. There will always be an important class of boys and girls who need the special instruction of private schools, and who will go elsewhere for it if they cannot get it at home. In the work of mental discipline and moral development, few institutions have won a more enviable reputation than the Collegiate Institute of Salem, New Jersey. It has been kept up to its standard by the hard and continuous work of its principal, Prof. H. P. Davidson, and he deserves from the public appreciation and practical assistance. The success of his students in college and in business shows very clearly that he knows how to develop in them the elements of success.

From M. H. Stratton, Esq., Member of State Board of Education.

Mr. and Mrs. H. P. Davidson, have for ten years conducted the Salem Collegiate Institute for youth of both sexes.

From my knowledge of them for that period, it gives me pleasure to certify to their thorough and conscientious instruction, to their careful attention to the morals and habits of their pupils and their lively interest in all that pertains to their progress in study and general welfare. During this time they have fitted a number of young men for different colleges, some of them for advanced classes.

To their boarders they aim to afford the security, order and refinement of a Christian home, and parents trusting their children to them, may be assured they will spare no pains to promote their improvement.

From Rev. Wm. Bannard, D.D., Pastor of Presbyterian Church, Salem.

PREFACE.

With volume V. of our Directory, we have adopted a name more in harmony with the wide amount of information which it contains. As the **EDUCATIONAL YEAR-BOOK**, we can only wish for it a reception as cordial as it has had in the past.

Our old friends will notice a number of changes. Several departments whose interest seemed not to justify their reprinting every year, have been omitted this time, and their place supplied with others of more general interest. The departments containing biographies and reports of educational bodies will, we feel sure, meet with a hearty reception, and we expect in future greatly to enlarge and improve them. By the department devoted to the Inter-State Collegiate Association, we hope to encourage a most laudable interchange of thought among our colleges.

Our constant aim in the arrangement of the materials has been to promote the convenience of parents, who are using the book as a guide in selecting a school for their children, and of teachers who use it as a reference book in their reading.

We desire to acknowledge our large indebtedness to the admirable documents and information furnished by Hon. John Eaton, U. S. Commissioner of Education, and to the kindness of the State Superintendents, who have been so prompt in furnishing us the latest educational statistics.

C. H. EVANS.

ELDREDGE & BRO., EDUCATIONAL PUBLISHERS,

No. 17 North Seventh Street, Philadelphia,

WE HAVE JUST PUBLISHED

8 NEW BOOKS.

Chase and Stuart's First Latin Book.

This book is complete in itself, and can be used by classes preparatory to using any of the Standard Latin Grammars. In a really brief form it presents all the main facts of inflection, and all the leading principles of syntax. The facts of inflection are impressed on the mind by means of appropriate exercises in translations from and into Latin, while the special vocabularies afford the student the proper material for his work. The principles or rules of Syntax are stated clearly and concisely, with ample illustrations, and such directions constantly accompany the exercises that ordinary intelligence may walk with a sure footing. Principles previously taught recur, but nowhere is a principle stated in advance of its proper place. A system of references keeps the student in communication with facts and principles already learned. The book is handsomely printed and durably bound. Teachers will do well to examine it.

Chase and Stuart's Latin Grammar.

We believe that this book will become the favorite Latin Grammar in our schools and colleges. It will please both pupils and teachers, because it states the facts of the language simply and clearly; its arrangement is philosophical; the paradigms are in clear, bold type, attractive to the eye; superfluous definitions and details are omitted; the abstruser parts of syntax, such as the different uses of the subjunctive, and the various forms of conditional sentences, are set forth more plainly and intelligibly than in most grammars; prosody appears in a clear and often novel light, with all the real improvements, but without the extravagances of recent metrists; and an unusual amount of valuable information is given in the appendix. The synoptical view of the four conjugations will save students a great deal of time and turning over of pages, when they wish to ascertain the voice, mood, and tense of the verbs they meet with in their reading. It is a capital merit of Chase's Grammar that its author has made it his business to teach the facts of the Latin language, rather than to air his knowledge of comparative grammar and general philology. At the same time he is evidently not inferior in this knowledge to any other of our eminent grammarians. He builds throughout on the sure foundations of the best established philological science; and wherever they would be of any real advantage to the learner he brings forward the facts revealed by comparative grammar. The origin and meaning of personal, mood and tense terminations of verbs, for instance, are set forth in accordance with the best authorities, but properly put in fine print, as adapted only for mature students.

The great excellence of the book is due to the author's life-long intimacy with Latin literature and his careful study of the usages of the Latin authors and the principles involved in them. Teachers and other competent scholars will notice many delicate points of superiority, especially in the syntax, to the explanations ordinarily given.

Another great merit of the book is, that while it is among the most comprehensive grammars extant, it has been brought within a reasonable compass. Adapted for the use of beginners in the Reader, it is also adequate for the wants of the college student, and is particularly complete and satisfactory in its explanation of the most subtle and delicate usages of the Latin writers. Taken as a whole, the book is a credit to American scholarship, and we have little doubt that it will, as soon as known, go into very general use in our schools and colleges.

Chase and Stuart's Latin Reader.

The selections are graded. First come, in quite easy Latin, those summaries of wisdom, some *Æsopic Fables*. Then follow some crisp and pithy *Anecdotes* of a somewhat more difficult cast. To these succeed some *Legends of the Heroic Age*, which have become the heritage of all literatures, entering largely into their warp and woof. The *Biographical Sketches* which follow introduce the student to original expressions of Roman thought, as these extracts are taken almost bodily from various Latin authors. The *Colloquies of Erasmus*, that great imitator of Cicero's style, show the language of polite intercourse; and the *Life of Atticus*, by Cornelius Nepos, gives, in graceful and polished Latin, a delineation of the character of one of the foremost of Roman gentlemen. The notes and grammatical references occupy a separate part of the book; the vocabulary contains full definitions, with an explanation of all idiomatic phrases under appropriate words.

Chase and Stuart's Ovid.—With Lexicon and Notes.

For class-room purposes this is the best edition of *Ovid* yet published in this country.

A Manual of Elocution and Reading.

By DR. EDWARD BROOKS, *Principal of State Normal School, Millersville, Pa.*

Dr. Brooks has done his work well, and we venture to predict that his book will take rank with the best of its class, and become a popular favorite. It is divided into two parts, Theoretical and Practical. The Theoretical is based upon and owes much to that universal standard, Rush's *Philosophy of the Human Voice*, which is a sufficient voucher that the principles taught have the stamp of truth and experience. The Practical part is a large representative of many-sided human nature. The copious extracts are from nearly all departments of our best literature; the humorous and the grave, the narrative and deliberative, the rich and picturesque, and the terse and vigorous, the emotional and phlegmatic, all find expression in poetry and prose. Indeed the great variety and extent of the selections are such that we doubt not many teachers will welcome them as more than an equivalent for the usual reading book.

The Crittenden Commercial Arithmetic and Business Manual.

New Revised and Enlarged Edition.

By PROF. JOHN GROESBECK, *Principal of Crittenden Commercial College.*

In every High School, Academy, Seminary and Select School in the land, the organization of a class in Commercial Arithmetic, Business Calculations and Forms, will prove an element of popularity and success that will yield rich and gratifying results. The subject itself is so intrinsically valuable as a means of developing thought, that were this the only result to be gained, it would be entitled to and should receive the special attention of the progressive teacher. But apart from this, the introduction of a study so exceedingly interesting and attractive to the scholar, and having so direct a bearing on his future welfare, will, in many an instance, decide the welfare of a school, directing the channel of popular opinion in its favor, and prove the means of filling it with students anxious to secure its advantages. The publishers believe the Crittenden Commercial Arithmetic to be the most teachable book of its character ever issued from the press. It occupies a field of its own, distinct and apart from any and all others, and that school in any section of the country which avails itself of the advantages to be gained by the introduction of this study and the use of this book, will, by its superior inducements and the success which naturally and necessarily follows those inducements, prove the tact and shrewdness of the teacher.

A Hand-book of Literature.—English and American.

By E. J. TRIMBLE, *Late Professor of Literature, State Normal School, West Chester, Pa.*

Here is a book that will receive a hearty welcome from both teachers and pupils, for we believe that no work on English and American Literature hitherto published fully meets the wants of teachers and pupils in this delightful branch of study. Some of them treat mostly of Literature as a History, some ignore the History and treat almost exclusively of authors, others treat sparingly of both these subjects and are made up mainly of selections. In the present volume all the subjects referred to, viz.: A History of Literature, Critical Notices of Authors, and a variety of selections, have received due consideration. A new and interesting feature will be found in the portraits of representative authors inserted in the vignettes at the beginning of the chapters.

The book is equipped for class-room work by the addition of a syllabus to each chapter which gives within the space of a page or two, the substance of the chapter. This is a valuable feature and will be appreciated by those who use the book. It is designed for the use of High Schools, Academies, Seminaries, Normal Schools, etc. It is destined to become a favorite and will be largely used.

First Lessons in Physiology and Hygiene.

By CHARLES K. MILLS, M. D.

In this little book an attempt has been made to present the important features of Physiology and Hygiene in such a manner as to combine interest with instruction. It is, as its name indicates, a book of "First Lessons," not an advanced book "boiled down," but the entire work is written in a pleasing and easy style, and in a manner calculated to interest and awaken the attention of the class of pupils for whose use it is designed. The popular feature of a syllabus at the end of each chapter has been included in this book, and we ask for it a careful examination. It cannot help but please, and in most cases an examination of the book will result in its adoption and use.

We invite the attention of Teachers to the following

MODEL TEXT-BOOKS,

CHASE & STUART'S CLASSICAL SERIES.

Comprising a First Latin Book, a Latin Grammar, a Latin Reader, *Cæsar's Commentaries, *First Six Books of Æneid, *Virgil's Eclogues and Georgics, *Sallust, *Cornelius Nepos, Horace, Livy, Terence, Tacitus, Juvenal, Cicero's de Senectute, et de Amicitia, Cicero's Tusculan Disputations, *Cicero's Orations, Cicero de Oratore, Cicero de Officiis, *Ovid, Virgil's Æneid.

The books marked with an (*) contain the text, notes and vocabulary; the others contain the text and notes, but not the vocabulary.

HART'S ELEMENTARY GRAMMAR—Teachers will be pleased with the little book. It is a plain, practical, common-sense introduction to the study of English Grammar, and will give satisfaction. Price 40 Cents.

GROESBECK'S PRACTICAL BOOK-KEEPING.—School Edition. Better adapted to the wants of pupils commencing the study than any other book in the market. Can be taught by any teacher with but little study, even if he has not mastered the science of Book-keeping. Price \$1.00.

WESTLAKE'S 3,000 PRACTICE WORDS.—The preparation of this book was forced upon Prof. Westlake by the wants of his own classes in the State Normal School, at Millersville, Pa. Its popularity is due to its intrinsic merit. Price 35 Cents.

WILSON'S ELEMENTARY ALGEBRA.—Without question, the most popular Elementary Algebra yet published. The aim has been to make everything as plain and simple as the nature of the subject would permit. Give it a trial; it will give satisfaction. Price \$1.25.

HART'S COMPOSITION AND RHETORIC.—The very general use of this book, in schools of all grades, is the best evidence of its merit. The present edition is printed from new electrotype plates, with larger type than in the old edition, and nothing else has been left undone to make it worthy of its remarkable popularity. Price \$1.35.

THE TEACHERS' MODEL POCKET REGISTER AND GRADE-BOOK.—This grade-book is more generally used than all the others combined. To see it is to use it. It is suited to all grades of classes and schools, from the primary school to the college. Price 55 Cents.

SEE WHAT THEY SAY.

"It is invaluable"—Pres. G. H. LAUGHLIN, Iowa.

"Would not be deprived of it for \$10."—*Literary Notes*.

"Invaluable for reference."—*The Church Union*, N. Y.

"We find it simply indispensable."—*The Teacher*, Phila.

"It is an encyclopedia of schools and school facilities."—*Central Baptist*.

"I am very much pleased with it."—Chancellor TELFAIR HODGSON, Tenn.

"Will be of inestimable value to a very large number of persons."—*St. Louis Evangelist*.

"It is a good book and well done."—Hon. M. A. NEWELL, State Supt. of Education, Maryland.

"This work tends to unite American teachers in a solid phalanx."—Prin. J. G. SMYTH, Arkansas.

"The Directory is quite useful in my business."—Hon. THOS. H. CRAWFORD, Supt. Schools, Portland, Oregon.

"For those wishing to correspond with institutions of learning, it is an invaluable aid."—*Illinois State Register*.

"It is the only full and reliable publication of the kind, and is of inestimable value for reference."—*Boston Globe*.

"I have often spent hours in gathering items of information which this will furnish in a moment."—Prin. A. MARKHAM, Wis.

"It puts me in connection with the grand army of instructors. You deserve the patronage of the profession."—Pres. J. H. LUTHER, Texas.

"It is a mine of valuable information to any one desiring knowledge with regard to the educational interests of the country."—*Home and School Visitor*.

"It will be found of great convenience to all seeking information with regard to the educational interests of the country."—*New England Journal of Education*.

"This book contains much valuable information, including the comparative statistics of elementary education for the whole world."—*California Christian Advocate*.

"I prize the Directory highly, and will gladly furnish any information from this office that may be of service in next issue."—Hon. J. A. SMITH, State Supt. of Education, Miss.

"Really quite a valuable document. It must have required a great deal of correspondence to gather up such an array of data on educational subjects."—*Michigan Christian Advocate*.

"The Directory is of great service to us, and must be of great value to all interested in the educational work of our country."—Hon. E. E. HIGGINS, State Supt. of Public Instruction, Penn.

"Merely as a list of these institutions for occasional reference, it is of value. As giving an idea of the scope of educational affairs, it is interesting and suggestive."—*Christian Union*, N. Y.

"I find the Directory very useful. Shall be pleased to send you the publications of this office, and aid you as I have opportunity."—Hon. JAMES P. SLADE, State Supt. of Public Instruction, Illinois.

"A very valuable Hand-Book of Education, and meets a want deeply felt by those who would understand the educational work going on in our country."—*Herald and Presbyterian*, Cincinnati.

"We are already under obligation to it, and are glad to say that it has not been found wanting. It contains information which it would be hard to find without it."—*Educational Weekly*, Chicago.

"No other publication contains so much information on the subject; it has taken in hand, and it will be found useful to all who are making inquiries in regard to schools."—*Central Christian Advocate*.

"A neat volume, wholly made up of just such information as is desired by so many thousands throughout the country. This is the only work of the kind we have ever seen, and we are much pleased with it."—*St. Louis Observer*.

"The enlarged and improved form of the AMERICAN COLLEGE DIRECTORY and UNIVERSAL CATALOGUE will be welcomed by all school workers. It will be of great service to this office as means of reference and general information."—Hon. D. F. DEWOLF, State Commissioner of Common Schools, Ohio.

"This department has received a copy of your very valuable COLLEGE DIRECTORY, and beg leave to thank you for this addition to our reference manuals of one which will be constantly useful. We shall be glad to furnish you any information from this office at any time that you may require."—*Mass. State Library*.

"The present volume includes all important educational enterprises of every kind throughout the United States. Every one interested in the work of education ought to possess this Catalogue. It gives a new and enlarged view of the vastness of the work of higher education which is in progress in the United States."—*Christian Statesman*, Philadelphia.

"The fourth edition of the AMERICAN COLLEGE DIRECTORY has made its appearance, enlarged, but in other respects similar to the former numbers. This annual keeps pace with the increase and advance of educational institutions, and is compact of conscientious work. The book contains notices of over 3,600 educational institutions, classified in an index, and each class treated under the head of the States alphabetically arranged. This system makes the book of easy reference, and the information embodied is of interest and value to a great many people besides those engaged in educational work. It has become a necessity to educators and other persons interested in education, and its information may be relied upon as correct."—*The Republican*.

ROBT D. ALLEN, Col. and Supt.

FARMDALE, KY.

KENTUCKY Military Institute

(SIX MILES SOUTH OF FRANKFORT.)

FOUNDED IN 1845; CHARTERED IN 1847.

ROBT D. ALLEN, - COL. AND SUP'T.

FARMDALE, KY.,

Under the direction and control of a Board of Visitors appointed by the Governor of the State, who is *ex-officio* Inspector. Academic staff, 9. Capacity, 125 boarders. In attendance, 110. Extensive libraries and ample supply of apparatus. Tuition for the academic year, \$100, in advance. Board, \$5 per week. Located on the site of the celebrated "Franklin Springs," one of the healthiest localities in the blue-grass region of Kentucky. The buildings and grounds, in architectural and horticultural taste, not surpassed by any place, private or public, in the State. Strict military organization. Three and four years' course of study. The idea aimed at in the system of instruction is *real life* in miniature. Every student is required, outside of his regular work, to devote a part of each day to spelling, writing and vocal music. Patronized by the wealthiest and most prominent men in this and other States. Weekly paper, "*K. M. I. News*," published in the Institute printing office.

A pamphlet of thirty-two pages, written by the Superintendent, entering into the details of methods in Instruction and Government introduced in 1874, sent on application.

Mulligan College. (formerly Buffalo Institute) near Johnson City. Organized 1868; unsectarian; course 3 to 6 years; tuition \$28 to \$33; board and washing \$2; 186 students: senior 6, sophomore 14; freshman 17; 10 graduates in 1882; value of grounds and buildings \$10,000.

CHRISTIE BROTHERS' MUSIC AND COMMERCIAL SCHOOL is in the College, and affords excellent opportunities for prosecuting those studies.

The leading aims of the College are, first, to train for the useful and practical of life; second, to do it at the least possible expense; third, to develop a moral and Christian character. During the present session seldom has an oath been heard, not an instance of the use of a strong drink, and most of the students are quitting the use of tobacco.

Four of the faculty have classical diplomas and others special training. *J. Hopwood, President.*

Southwestern Baptist University, Jackson. Organized 1874; Baptist; faculty 6; course 4 years; library 2,000 volumes, 270 pamphlets; tuition \$56; board \$3; 128 students; 4 graduates in 1882; value of apparatus \$2,500; value of grounds and buildings \$50,000; endowment \$58,000. *George W. Farman, LL.D., President.*

University of Tennessee and State Agricultural College, Knoxville. Organized 1807; State; faculty 12; course 4 years; library 3,610 volumes, 300 pamphlets; tuition \$30; board \$2.50; 215 students; 16

graduates in 1882; value of apparatus \$3,000; value of grounds and buildings \$120,000; endowment \$400,000. *Rev. Thomas W. Humes, S.T.D., President.*

MT. CARROLL SEMINARY.

Mrs. F. A. W. SHIMER, Principal.

Mt. Carroll, Ill.

MT. CARROLL SEMINARY,

MT. CARROLL, CARROLL COUNTY, ILL.

Incorporated in 1852, founded in 1853, and has been for the past twenty-nine years under the charge of the same Senior Principal. It has uniformly held a high rank among institutions of its class, drawing a large patronage from near and distant localities. Its graduates are in different sections from New England to California. During all the years of business depression, and the diminished attendance of many schools, and entire failure of some, this Seminary has enjoyed marked prosperity and a steadily increasing attendance, demanding enlarged accommodations, which want has been met in the erection of a third *addition* of nearly the capacity of the three previous buildings. It is furnished with modern improvements, as furnaces, with the most approved system of ventilation, gas fixtures, bath-rooms, with hot and cold water on every floor, etc., etc. *The location is delightful and justly celebrated for its healthfulness*, serious illness being almost unknown here. In a period of over twenty-nine years but two deaths among students have occurred (and those at an interval of twenty years), both being from chronic disease for which they were under treatment when they entered the school.

Its **Preparatory**, its **Regular Four-Year Course**, and its **Normal Course** are well arranged, and great thoroughness required. The regular classical course will be modified to meet the wants of students wishing to prepare for an extended college course. To the **Department of Fine Arts** is given a prominence not usual in literary institutions.

Its **Conservatory of Music** is not excelled. It employs five to seven professors and teachers of music, and has over thirty pianos and organs in use. The present year of the Conservatory opens with twenty *new* pianos for practice. While the advantages of this department are of the best, its expenses are very much less than must be paid for the same grade of instruction elsewhere. The Graduating Course in Music is extended and thorough.

Elocution is made prominent with all, with special instruction given to those preparing to teach, or for public reading and lecturing.

A **Department of Telegraphy** affords rare opportunity for students to prepare for a pleasant and lucrative business. A telephone connects the office with the principal business centers of this city and with cities in this and adjoining counties.

Diplomas Conferred on the completion of any one of the prescribed courses.

Medals Awarded for superior excellence in art and music.

Optional Courses may be taken in the different departments.

Expenses Reduced to lowest possible figures for first-class accommodations and superior instruction. **Pecuniary Aid** given those needing and deserving it.

Manual Labor given to those who would economize expenses. Large discounts to daughters of clergymen and missionaries. **Tuition Free** to daughters of soldiers who died in the service. To aid in elevating the standard of public schools, *tuition free in the Normal Department* is given to one teacher from each county in the State, and one from each town in Carroll county. The work of this department is of *the best and most thorough*. The *latest approved methods* are used, keeping fully abreast with the times. The reputation of the graduates from this institution is such that they readily command positions among the first in whatever sphere their preparation has designed them. Rev. J. A. Smith, D.D., of Chicago, says: "We feel warranted in pronouncing this school, for all the highest purposes of education, one of the best in our knowledge. We regard it as unsurpassed in the West, whether as respects the judiciousness of the discipline or the substantial value of the instruction." *The Oread*, giving particulars, sent free. Address,

PRINCIPAL MT. CARROLL SEMINARY.

By permission we refer to the following patrons of the school: O. P. Miles, Rev. Wells, Hon. James Shaw and W. R. Hostetter, Mt. Carroll, Ill.; Rev. T. P. Campbell, Delavan, Ills.; Hon. H. M. ST. LOUIS SEMINARY.

JENNINGS, Mo.

ST. LOUIS SEMINARY

Was projected in the year 1871. Property possessing great natural beauty, valued at \$10,000, was subsequently improved at an expenditure of \$11,000, now worth \$25,000.

The sight is a commanding eminence, from which much of the city of St. Louis and the Mississippi River are distinctly seen, on the route of the Wabash, St. Louis and Pacific Railway, three-fourths of a mile from city limits, and a few hundred yards from Woodland Station.

The location, though so near the great city of St. Louis—only a few minutes' ride on the cars to the centre of the city—is remarkably quiet and healthy, there being no business houses whatever near, but is surrounded by beautiful suburban homes.

Regarding its healthiness, the natural beauty of the surrounding scenery, its proximity to St. Louis, offering to the pupils access to the Museums, Art Galleries, Concerts, Lectures, and many other means of culture presented by a great metropolis, yet free from the bustle, temptations and unhealthiness thereof, the Seminary is most advantageously located.

The spacious building is surrounded by a shady lawn of six acres, tastefully laid out with walks, bordered with flowers and ornamental shrubbery, all conspiring to render the place an attractive home.

The large, well-ventilated rooms have all been arranged with a view to health and comfort.

The school is of select character, of high grade for young ladies. The number of pupils is limited, thereby obviating the injurious effects of crowding large numbers together. Each pupil may here receive, individually, the special attention needed, and, though in school, she may enjoy the advantages of a Christian home, with no sectarian influence, but her religious culture guarded most carefully.

The Course of Study is full and thorough, comprising whatever is demanded both for the literary and ornamental culture of a young lady. Special advantages are offered in Music, Painting, Drawing, Sketching, etc. Pupils receive the most careful instruction of teachers of large experience in their respective departments.

Guardians desiring a home for their wards, as well as a place for their thorough education, may be assured that very special care will be bestowed on them in this Seminary throughout their educational period.

Great care is devoted to personal neatness, morals, manners, and whatever may secure preparation for real life. The expenses not extravagant, but sufficient to afford all needed home comforts, and thorough instruction.

The Seminary for the past year has been full ; parties desiring rooms will do well to make an early application, for only a limited number is taken.

JENNINGS, Mo.

 Western Normal College, Bushnell.
 St. Joseph's Female Academy, Cairo.

Allen Academy and Polytechnic Institute, 144 and 146 Twenty-Second Street, near Michigan Boulevard, Chicago. A most elegantly and thoroughly equipped boarding and day school for boys and girls of five to twenty years of age. Prepares boys for Harvard, Yale, Princeton, or any university, and girls for Vassar or any other college, or, if they prefer, completes their higher education and

graduates them here. Prepares also thoroughly for business life. A few boarding pupils received into the family of the President, and enjoy rare advantages. The academy and residence are in the most fashionable division of the city, and only three blocks apart. New pupils received at any time when there are vacancies. Faculty of 20 experienced teachers. Term opens Sept. 11. Send for catalogue. *Ira Wilder Allen, A.M., LL.D., President.*

◀ FOR BOYS. ▶

ST. LOUIS, MO.

Corner Sixteenth and Pine Streets.

A first-class High School. Organized in 1878; *unsectarian*; two courses—the classical and commercial; departments of music and elocution. Thorough instruction; rigid discipline; careful attention paid to the manners and morals of the pupils. The boarding students, although placed under strict surveillance, are made to feel at home. The aim of the School is to give pupils a short, practical education preparatory to a professional or mercantile life. Special instruction given to any who desire to enter the Manual Training School of St. Louis.

For catalogues, address

ALABAMA.

State Agricultural and Mechanical College, Auburn.

CALIFORNIA.

University of California, Berkeley.
School of Engineering, 24 Post st.,
San Francisco.

COLORADO.

Colorado College, Colorado Springs.
Colorado Agricultural College,
Fort Collins. Organized 1879;
State; faculty 8; course 4 years;
library 350 volumes, 1,200 pamphlets;
tuition free; board \$8; 57 students:
junior 5, sophomore 12, freshman 16,
preparatory 16, special 6; value of apparatus
\$1,000; value of grounds and buildings
\$40,000; excellent facilities for instruction
in chemistry and the mechanic arts;
a thorough practical education given;
school open to both sexes; the cheapest
school in the State or on the Eastern
Rocky Mountain slope. *Charles L. Ingersoll, M.S., President.*

CONNECTICUT.

Sheffield Scientific School, New Haven.

DELAWARE.

Agr'l Dep't Delaware College, Newark.

FLORIDA.

State Agricultural College, Eau Gallie

GEORGIA.

State College of Agriculture and Mechanic Arts, Athens.
Atlanta University, Atlanta.
Southwest Ga. Ag. College, Cuthbert.
North Ga. Agr. College, Dahlonega.
Middle Ga. Ag. College, Milledgeville.
South Ga. College of Agriculture, Thomasville.

ILLINOIS.

Illinois Industrial University,
Urbana. Organized 1861; State;
faculty 24; course 4 years; library
13,500 volumes, 2,500 pamphlets;
tuition free; incidental fee \$22.50;
board \$2.50 to \$5; 400 students;
34 graduates in 1882; value of apparatus
\$60,000; value of grounds and buildings
\$450,000; endowment \$320,000. *Selim H. Peabody, Ph.D., LL.D., Regent.*

INDIANA.

Rose Polytechnic Inst., Terre Haute.

NEW HAMPSHIRE.

College of Agriculture, Hanover.
Thayer School of Civil Engineer-
ing, Hanover.

NEW JERSEY.

Stevens Institute of Technology,
Hoboken. Organized 1871; un-
sectarian; faculty 11; course 4
years; library 5,000 volumes, 1,000
pamphlets; tuition \$150; board \$6
to \$10; 155 students: senior 18,
junior 44, sophomore 43, freshman
50; 112 graduates in 1882; value
of apparatus \$50,000; value of
grounds and buildings \$250,000;
endowment \$500,000. *Henry Mor-
ton, President.*

Rutgers Scientific School, New
Brunswick.

College of New Jersey, Princeton.

NEW YORK.

Colleges of Engineering, Agricul-
ture, Architecture, Mechanic Arts,
etc., Cornell University, Ithaca.

Cooper Union Free Night Schools,
New York.

School of Mines of Columbia Col-
lege, New York.

University of the City of New York,
N. Y.

Union College, Schenectady.

Rensselaer Polytechnic Institute
Troy.

United States Military Academy,
West Point.

NORTH CAROLINA.

Agricultural and Mechanical College
University of North Carolina,
Chapel Hill.

COLORADO STATE SCHOOL OF MINES,

LOCATED AT
GOLDEN, COLORADO.

FACULTY:

ALBERT C. HALE, A.M., E.M., Ph.D., President.
Professor of Chemistry and Assaying.

MILTON MOSS, E.M., Ph. D., ARTHUR LAKES,
Professor of Mineralogy and Metallurgy. *Professor of Geology and Drawing.*

MAGNUS C. IHLESEN, E.M., C.E., Ph.D.,
Professor of Physics, Mathematics and Engineering.

GEORGE S. MACKENZIE, Ph.D., ERI P. RICE,
Laboratory Instructor. *Secretary and Assistant in Chemistry.*

CARLTON H. HAND, HARRY C. CARNEY, A.B.,
Assistant in Assaying. *Assistant in Mathematics.*

CALENDAR 1882-83.

First Term begins September 27, 1882, ends December 15, 1882.

Second Term begins January 3, 1883, ends March 21, 1883.

Third Term begins March 26, 1883, ends June 1, 1883.

Regular courses of instruction of four years each in

**Mining Engineering, Metallurgy and Civil
Engineering.**

Special courses in

Assaying, Surveying and Chemical Analysis.

TUITION FREE.

The reduction works, coal mines and manufacturing interests of Golden; the great variety and importance of the geological formations in the immediate neighborhood; the famous gold mines at Black Hawk, Central and vicinity; the silver mines of Clear Creek County, and the various mills and reduction works of those regions, all of which are readily accessible and frequently visited by the students, often in company with the professors, conspire to render the advantages offered by the COLORADO STATE SCHOOL OF MINES superior to those of any institution of the kind in the country for combining practical observation and study with the knowledge obtained from books.

MISSOURI

SCHOOL OF MINES AND METALLURGY,

ROLLA, PHELPS COUNTY, MO.

New Classes are formed twice in each year: on 3rd Monday in September, and 1st Monday in February; but students may enter at any time, and by taking fewer studies prepare themselves for future classes.

The Courses of Study are so arranged as to insure the highest culture, and the best preparation for business.

The following Courses of Study are independent of each other, but parts of each course may be studied by any not wishing to take the Degrees:

1. **BUSINESS COURSE**, or Book-keeping in all its forms, together with English Grammar, Word Analysis, and Higher Arithmetic.

2. **TEACHER'S COURSE**, or all studies necessary to prepare young men or young women for the successful prosecution of their work in the Public Schools. The State Superintendent gives his certificate on this Course.

3. **ART COURSE**, or Drawing, mechanical, free-hand, and ornamental, together with Painting in Water Colors and in Oil. The student who completes this Course has but a step further to go to become an architect.

4. **LITERARY COURSE**, or four years in each of the following Languages: English, Latin, Greek, German, French, and Spanish. Less time than four years may be taken on any one of the languages, but four years will be required for the Certificate of Proficiency, entitling the student in connection with his other studies to the Degree of A.B. from the State University.

5. **CIVIL ENGINEERING**, or three years' Course of Chemistry, Physics, Geology, Mineralogy, Astronomy, Mathematics, Assaying and Mechanical and Topographical Drawing; the whole being taught by recitation, lecture, illustration, and practice, thus fitting the graduate for actual work in his profession, and making him worthy of the confidence of any who desire his services. Portions of this Course may be pursued by those who wish only to become surveyors.

6. **MINE ENGINEERING**, or a three years' Course of Chemistry, Physics, Mine Engineering, Geology, Mineralogy, Metallurgy, Assaying, Mathematics, and Drawing. This Course gives the student about four hours a day for Chemical Analysis in the Laboratory, and may be partially followed out by any who wish to prepare themselves for assaying alone. It gives the finest preparation a student of Medicine can get for carrying on successfully his chosen profession.

7. **GIRL'S COURSE IN ARTS**, or all the studies of the Preparatory and Teacher's Courses, together with Astronomy, Geology, Trigonometry, three years in Drawing and Painting, Mensuration, and one ancient and one modern language.

COST FOR THE WHOLE YEAR:

| | |
|---|----------|
| TUITION IN ANY, OR ALL OF THESE COURSES, ONLY | \$ 20.00 |
| BOARD, WASHING, FUEL, LIGHTS, ETC., | 140.00 |
| BOOKS FOR THE YEAR, ABOUT | 18.00 |
| | \$178.00 |

Tennessee. Hon. W. S. Doak, State Superintendent of Schools, Nashville. School population: white 403,353; colored 141,509. (School age 6-21.) Enrollment: white 229,290; colored 60,851. Average attendance: white 150,854; colored 40,607. Average days of school annually 68. Number of teachers—white, male 3,506; female 1,201: colored, male 913; female 334. Average salary \$20.66. School fund \$2,512,500. Annual income \$930,734. Number of schools: white 4,334; colored 1,188. Value of school property \$1,066,994.

Texas. Hon. B. M. Baker, Secretary State Board of Education, Austin. School population 208,324. (School age 8-14.) Enrollment 192,616. Average days of school annually 80. Number of teachers—white, male 2,895; female 760: colored, male 562; female 113. Average salary: male \$42; female \$33. School fund \$3,385,571. Annual income \$972,904. Number of schools—white 4,551, colored 1,253.

Vermont. Hon. Justus Dartt, State Superintendent of Education, Ascutneyville. School population 92,535. (School age 5-20.) Enrollment 73,068. Average attendance 47,772. Average days of school annually 126. Number of teachers: male 653; female 3,723. Average monthly salary: male \$30.52; female \$18.24. School fund \$669,087. Annual income \$491,021.40. Number of schools 2,527. (Report for year ending March 31, 1882.) A. E. Leavenworth, President State Teachers' Association, Castleton. Next annual meeting at Montpelier, in October.

Virginia. Hon. R. R. Farr, State Superintendent of Public Instruction, Richmond. School population: white 314,827; colored 240,980. (School age 5-21.) Enrollment: white 172,034; colored 85,328. Average attendance: white 97,997; colored 46,907. Average days of school annually 118.2. Number of teachers: male 3,181; female 2,416: white 4,538; colored 1,059. Average monthly salary: male \$29.47; female \$25.61. School fund \$1,345,542.93. Annual income \$745,950.20. Value of school property \$1,346,656.86. Number of schools: white 4,062; colored 1,525. (Report for year ending July 31, 1882.) Col. C. S. Venable, President State Teachers' Association, University of Va. Next annual meeting at University of Virginia, in August.

West Virginia. Hon. Bernard L. Butcher, State Superintendent of Free Schools, Wheeling. School population: male 112,715; female 103,800: white 208,185; colored 8,420. (School age 6-21.) Enrollment: male 83,199; female 72,345: white 151,098; colored 4,446. Average attendance: white 94,017; colored 2,635. Average days of school annually 99. Number of teachers: male 3,045; female 1,315: white 4,270; colored 120. Average salary: male \$27.87; female \$30.64. School fund \$509,305.11. Annual income \$988,620.08. Value of school property \$1,823,987.16. Number of schools: white 3,903; colored 125. (Report for the year ending June 30, 1882.) Hon. Bernard L. Butcher, President State Teachers' Association, Wheeling. Next annual meeting, 2d Tuesday in July.

Wisconsin. Hon. Robert Graham, State Superintendent of Public Instruction, Madison. School population: male 251,828; female 243,885. (School age 4-20.) Enrollment 303,807. Average days of school annually 165. Number of teachers: male 2,463; female 7,632. Average salary in counties: male \$38.91; female \$25.40; in cities: male \$104.10; female \$36.60. School fund \$4,486,215. Annual income \$350,446. Number of schools: graded 486; ungraded 5,300. Value of school property \$5,614,939. (Report for year ending May 31, 1882.)

Alaska. When the territory belonged to Russia the Greek priests conducted a number of schools, but since its purchase by the United States education has fallen badly into decay. Since 1877, the Presbyterian Missionary Board have taken the matter in hand and established schools at Fort Wrangell, Sitka, Takoo, Haines, Boyd, and Hydah Tribe. These are all under the superintendence of Rev. Sheldon Jackson, D.D., and are reported as doing well.

Arizona. Hon. Moses H. Sherman, Territorial Superintendent of Public Instruction, Prescott. School population 7,148. (School age 6-21.) Enrollment 4,212. Average attendance 2,847. Average days of school annually 109. Number of teachers: male 48; female 53. Average salary: male \$83; female \$70. Annual income \$67,028. Number of schools 101.

Dakota. Hon. W. H. H. Beadle, Territorial Superintendent of Public Instruction, Yankton. School population: male 24,361; female 23,785. (School age 5-21.) Enrollment: male 16,846; female 16,324. Average

days of school annually 89. Number of teachers: male 437; female 989. Average salary: male \$34; female \$26. Annual income \$487,000. Value of school property \$850,000. (Report for year ending March 31, 1882.)

District of Columbia. Hon. J. Ormond Wilson, Superintendent of Public Schools, Washington. School population: white 29,612; colored 13,946. Enrollment: white 18,678; colored 9,642. Average attendance 21,469. Average days of school annually 193. Number of teachers 485. Average annual salary \$653.40. Annual income \$546,811.18. Number of school rooms 395. Value of school property \$1,316,355. (Report for year ending June 30, 1882.)

Idaho. Hon. James L. Onderdonk, Territorial Superintendent of Public Instruction, Boise City. School population 9,650. (School age 5-21.) Number of teachers 200. (Report for year ending Sept. 1, 1882.)

Indian Territory. Indians in the United States 256,127. School population 47,718. Enrollment 13,338. Number of Indians who can read 46,330. Number of schools 394. Annual expenditure \$604,375.

Montana. Hon. R. H. Howey, Territorial Superintendent of Public Instruction, Helena. School population: male 5,832; female 5,437. (School age 4-21.) Enrollment 6,054. Average days of school annually 135. Number of teachers: male 64; female 127. Average salary: male \$75.74; female \$64.20. Annual income \$119,357.59. Number of schools 189. (Report for year ending Dec. 31, 1882.)

New Mexico. School population 29,000. Enrollment 7,829. Number of schools 163.

Utah. Hon. John Taylor, Territorial Superintendent of District Schools, Salt Lake City. School population: male 17,833; female 17,096. (School age 6-16.) Enrollment: male 11,937; female 11,137. Average attendance 16,076. Average days of school annually 139. Number of teachers: male 261; female 248. Average salary: male \$45; female \$22.50. Annual income \$136,689. Number of schools 373. Value of school property \$393,984.

Washington Territory. Hon. C. H. Wheeler, Territorial Superintendent of Public Instruction, Waitsburg. School population: male 15,387; female 11,661. (School age 4-21.) Enrollment: male 8,592; female 10,341. Average attendance 15,200. Average days of school annually 92. Number of teachers: male 400; female 250. Average salary: male \$52; female \$43.50. Annual income \$116,820. Value of school property \$300,000. Number of Schools 812. (Report for year ending Aug. 31, 1882.) Hon. C. H. Wheeler, President State Teachers' Association, Waitsburg. Next meeting at Olympia in Oct.

Wyoming. Hon. John Slaughter, Territorial Superintendent of Public Instruction, Cheyenne. Enrollment 2,090. Average attendance 1,287. Number of teachers: male 20; female 29. Average salary \$55.94. Annual income \$22,120.

ELEMENTARY, SECONDARY, AND SUPERIOR EDUCATION IN SIXTY PRINCIPAL COUNTRIES.

[illegible]

FOREIGN.

Austria. Conrad Von Eybesfeld, Minister of Public Instruction, Vienna. In 1873 the number of army recruits who could read and write was only 53 per cent. ; in 1880 this had increased to 69 per cent. The school law of 1868 made school attendance compulsory for 8 years, but in the rural districts absence is allowed during the busy season. In Hungary the first female high school was established in 1880. In 1873 there were 600,000 children not attending school, and of those who went 300,000 were without books.

Belgium. P. Van Humbeeck, Minister of Public Instruction, Brussels. The minimum salary for primary teachers is \$200 and house rent. This is increased every 5 years until it reaches \$320. In Brussels poor children are furnished free with books and clothing, and in winter with a warm dinner. Great attention is given to industrial education.

Denmark. A. C. P. Linde, Minister of Public Instruction, Copenhagen. Education is not free, but all charges are remitted in the case of poor pupils. Attendance is compulsory from the age of 7 to 14. All instruction is under church supervision. In Iceland all children are educated by their mothers, and it is said that all can read, write and cipher at the age of 7. Confirmation is refused until they are properly educated. Iceland has no illiterates, no prisons, no police, no army, no thieves.

Finland. Dr. L. Lindelof, Director of Educational Affairs, Helsingfors. The University has 694 students, and an income of \$225,000 a year. There are 23 lyceums with 3,348 students; and a private citizen has donated \$200,000 for the establishment of a commercial institute. There are a number of private ambulatory village schools.

France. Jules Ferry, Minister of Public Instruction, Paris. Under the Republic during the past 10 years public education has made wonderful advances. Paris now spends nearly \$3,000,000 annually on free schools. Attendance from 6 to 14 is compulsory throughout the entire country; boys and girls are educated separately; the standard of teachers' examinations has been greatly raised. All forms of corporal punishment are prohibited by law, and the teacher who strikes a scholar is prosecuted. A number of seminaries for girls have been opened.

Germany. The reformed spelling has been introduced in nearly all the German States, and has created so much confusion that all imperial officials are forbidden to use it. The trying character of German print and the unscientific lighting of school-rooms, have made near-sighted-

ness wonderfully prevalent—in some higher institutions affecting 80 per cent. of the students. The authorities are now investigating the matter. Many of the villages are poorly supplied with school facilities. In some the schoolmaster must take care of 300 children in one room of his house, while a second room is the dwelling of his family, and a third contains a servant and a cow. Boys and girls are educated separately, and girls are taught sewing. Attendance at school is compulsory.

Great Britain. The public schools are not free, but all fees are remitted in the case of poor children. Attendance is compulsory, and since the passage of the education bills in 1870 and 1876, public education has made wonderful advances. Military drill and cookery are taught in many schools, and about 2,000 school savings banks have been established. Like nearly all European countries, England grants pensions to superannuated teachers. The universities are Oxford, with 25 colleges, 43 professors and 2,814 students; Cambridge, with 17 colleges, 36 professors and 2,497 students; Durham, with 7 professors and 204 students; London, which merely examines and confers degrees upon those who are educated elsewhere; Victoria, with its center at Owens College, Manchester and other colleges at different cities of Northern England; Edinburgh, with 3,172 students; Glasgow, with 28 professors and 2,292 students; Aberdeen, with 714 students; St. Andrews, with 15 professors and 197 students; Dublin with 30 professors and 1,730 students; Royal University of Ireland, an examining body like the University of London; and the Catholic University of Dublin.

Greece. Boys and girls are educated separately in the primary schools, and there is more than five times as much provision for the boys as for the girls. There are 63 academies. The University of Athens has 54 professors and 1,352 students. A polytechnic school at the same place has 23 professors and 582 students.

Italy. F. De Sanetis, Minister of Public Instruction, Rome. Italy spends \$1.56 per capita for army expenses and 11 cents per capita for schools; so the schools languish, although gradually improving—and illiteracy has greatly diminished. Attendance is compulsory from the ages of 6 to 10, and nearly all the schools are free. The government spends \$30,000,000 annually for education.

Netherlands. W. Six, Minister of the Interior, The Hague. There are 4 universities: Amsterdam, with 577 students; Leyden, with 485, Utrecht, with 403, and Groningen with 202; 29 gymnasia, with 1,676 students; 91 polytechnic schools with 8,100 students; 11 secondary schools for girls, with 852 students; 5 naval schools, with 441 students, and 5 normal schools, with 548 students. Of the adult population about 30 per cent. are illiterate. The State spends \$5,000,000 annually for education.

Portugal. The University of Coimbra has 72 professors in its five faculties, and 766 students. The government is trying hard to exclude the Jesuits from all schools.

Russia. Russia spends \$4,000,000 annually for the education of 11,800 students in military schools; but primary education is sadly neglected, and a very small proportion of the children go to school at all.

Spain. The metric system of weights and measures has been used throughout Spain since July, 1881. Popular education has made very little progress.

Switzerland. The government is abolishing the use of German type in the schools on account of the injury it does the eyes, and are adopting the Roman. The University of Geneva is growing rapidly, having now over 400 students. The average time spent in teaching by the female teacher is 8.7 years; by male teachers, 15.5 years.

Asia. The law of British India now permits the employment of a child in factories at the age of 7. The government spends \$3,500,000 a year for education, but very little on primary schools. Madras University is doing well. Missionary schools are doing much good. In Burmah nearly every boy goes to school some time.

Japan. Fukuoka Takachika, Minister of Education, Tokio. Education is advancing rapidly. Every ward or village is required to provide a school; which is not free, but all charges are remitted for poor children. Attendance from the age of 6 to 14 is compulsory. No corporal punishment is allowed. The University of Tokio has 62 professors and 205 students. The instruction is at present nearly all given in English. There are 3 faculties and 9 courses of 4 years each.

Africa. In Egypt education has, during the past few years, made wonderful advances. In her South African dependencies England has devoted some attention to education, but the newness of the country, excitement of speculation, and ignorance of the people make it hard to secure attendance.

Ontario. Adam Crooks, Minister of Education, Toronto. School affairs are progressing a good deal. Teachers' salaries are very low. Religious influences predominate in the schools.

Quebec. Gedeon Ouimet, Superintendent of Public Instruction, Quebec. Worn-out teachers are retired on a pension. Although the expenditures have been considerably increased in the past few years, the attendance has fallen off.

Argentine Confederation. The government contributes one-third of the money for support of the district schools. Compulsory attendance laws have been passed, but the sparseness of the population interferes with their execution.

Chili. In education Chili excels her South American sisters, and this doubtless has to do with her present commercial and military ascendancy.

New South Wales. John Robinson, Minister of Public Instruction, Sidney. The ministry of education has recently been created, and the primary school charges reduced one-half, so that they are now 3d. a week. The effect on public education has been very good.

Victoria. W. Collard Smith, Minister of Public Instruction, Melbourne. There are 100 savings banks carried on in connection with the schools, in imitation of the European system.

THE UNIVERSITY OF BONN.

The subject of German universities being one of such common interest, we have thought best to give a brief sketch of one of the most famous. The University of Bonn was originated about 1750, and is therefore one of the youngest universities. It was closed by Napoleon in 1797, because the professors refused to take the oath of allegiance to France. In 1818 it was re-established by the King of Prussia.

The highest authority at the university is the curator, who represents the Minister of Education, and has entire financial control, recommends improvements and grants leaves of absence to the faculty. The curator is quite permanent in tenure of office, Bonn having had only three in sixty-five years. Next to him comes the rector, who is elected annually by the ordinary professors, from a list of three candidates. The duties of rector correspond largely to those of college president with us. In his absence his duties are performed by the prorector, or rector of the previous year. The university judge is the legal representative and adviser of the institution; he also has power to determine punishments for minor offenses. Graver matters and expulsion must be decided by the senate, composed of the rector, prorector, judge, the deans of the five faculties, and four members chosen by the ordinary professors. Each faculty has its dean, or executive officer.

The lowest teacher at the university is the privat-docent, who lectures gratuitously and gives private lessons. His income is very meagre. He must have the degree of doctor and other qualifications which require two years' work after graduation, and must pass an examination before the faculty. After three years in this capacity, he applies to the faculty for advancement to the rank of professor extraordinary. In this rank his labors and pay are about the same, except that he may be called on as supply in the absence of the ordinary professor. Once in this rank, he is likely to be called as ordinary professor in some lower university, whence he works to be called to the higher ones much the same as in this country. All the professorships are filled with the approval of the Minister of Education, and the appointment is signed by the King. The ordinary professor is the regular paid lecturer of the university. He receives a salary and lecture fees. At Bonn the professors' incomes range from \$1,000 to about \$5,000 a year, according to the importance of the department and popularity of the lecturer. There are 20 privat-docenten, 25 extraordinary professors, and 65 ordinary professors, divided among five faculties: Catholic Theology, Protestant Theology, Law, Medicine and Philosophy. As these are required to teach all human science, the work of the professors is very laborious. They take the greatest pains never to be absent from a lecture, or in anywise fail to give it according to programme. All their instruction is given in closely read lectures of 45 minutes each.

For entrance a student must be a graduate from a gymnasium (academy) or real-schule (polytechnic school), or something equivalent. The entrance is by examination. The year's work is less than 8 months, divided into two semesters, one extending from the 1st of November into March, and the other from the latter part of April to the first of August. A poor student may take the course on credit, binding himself to pay 6 years after the completion of his course.

Northwestern Inter-State Collegiate Association.

OFFICERS**FOR THE YEAR 1882-3.**

PRESIDENT—G. E. LESLIE, JACKSONVILLE, ILL.**VICE-PRESIDENT—D. P. JONES, MINNEAPOLIS, MINN.****SECRETARY AND TREASURER—FRED. S. SHEPHERD,
BELOIT, WISCONSIN.**

The next Contest will be held at Minneapolis, Minn., May 3, 1883.

**MINUTES OF THE CONVENTION, HELD AT INDIANA-
POLIS, MAY 3, 1882.**

The delegates to the Convention assembled in Parlor A, of the Bates House, at 9:30 A. M., on the 3d day of May, 1882.

President Roger Leavitt, of Wisconsin, occupied the chair, and D. P. Jones, of Minnesota, was secretary. Immediately upon calling to order and reading the minutes of the previous Convention, the President appointed C. L. Goodwin, Vice-President and D. P. Jones, Secretary, a Committee on Credentials. The Committee reported the following delegates as entitled to seats in the convention:

FROM IOWA—S. B. Howard, R. F. Hurlburt, A. J. Craven.

“ MINNESOTA—Seldon Bacon, D. P. Jones, W. W. Clark.

“ OHIO—C. E. Jefferson, Charles Kirchbaum, D. F. Bradley.

“ WISCONSIN—W. F. Cooling.

“ ILLINOIS—W. F. Johnson, Wm. Monroe, H. L. McCune.

The committee also reported two contesting delegations from Indiana, neither possessing the proper credentials. After considerable discussion, it was moved and carried, to appoint a select committee of three, who

should consume an hour and a half in investigating the Indiana trouble and credentials. The committee appointed were D. P. Jones, Minnesota, Seldon Bacon, Minnesota, and R. F. Hurlburt, Iowa. At the time set, the committee were ready to report, and on the re-assembling of the Convention, presented the names of Messrs. Merritt, McElroy and Dillon, as most entitled to seats in the Convention, but declared neither delegation as legally entitled to the rights of delegates. In this case there was either no election of delegates or the merits of the case were with the Merritt, McElroy and Dillon faction. The Convention decided the latter to be the truest way of settlement, and the above-named gentlemen were admitted to the Convention. The Convention then adjourned until 2 p. m.

The Convention was called to order at 2 p. m. The report of the Committee on "Time and Place," was called for, in which they recommended that the next Inter-State Contest be held at Minneapolis, Minn., on the evening of the third Thursday in May, 1883, and that the Convention of the Association be held in the morning of the same day. The Committee also recommended that the Contest in 1884 be held at Milwaukee, Wis. The report was accepted after making the date of the next Contest at Minneapolis the *first* (1st) Thursday of May instead of the third.

The report of the Committee on Officers was called for. The Committee could not agree on nominations, so the Convention proceeded by nomination and ballot to select officers for the ensuing year. The result of the election was as follows:

PRESIDENT—G. E. Leslie, of Illinois.

VICE-PRESIDENT—D. P. Jones, of Minnesota.

SECRETARY AND TREASURER—Fred. S. Shepherd, of Wisconsin.

The report of the Committee on Resolutions was then given, with recommendations regarding amendments to the Constitution, as follows:

That the word *Missouri* be dropped from ART. I. In ART. IV., SEC. 2, have it to read: "He shall have printed 600 copies of the Constitution and shall send 100 copies to the Secretary of each State Association." Also, in same section, to provide for depositing the Secretary's bond with the President of the Association.

In ART. VII. to add SEC. 2, which shall read: "No delegate shall be entitled to a seat in the Convention whose credentials shall not have been signed by the President and Secretary of his State Association."

Also, in SEC. 5, of ART. X., to provide: That, the first prize shall be \$75, and the second prize \$50.

All these recommendations were accepted and the Constitution was ordered to be changed as suggested.

The Secretary read an application for admission to the Association from Nebraska. Moved to inform the State of their admission when they should present orator and delegates at the annual convention. Carried.

An amendment was proposed to provide for *five* judges instead of *three* and a referee. The motion was laid on the table. The Convention then adjourned until 8:30 Thursday morning.

The Contest occurred in the evening, at the English Opera House in the presence of a large and cultured audience.

PARLOR OF THE BATES HOUSE, 8:30 A. M., THURSDAY.

The amendment regarding judges was taken from the table and, after some discussion, was adopted, as follows:

ART. V., SEC. 1. *Five* "persons," instead of *three*, and cross out from—"also one person" to "is held."

Also amended SEC. 6 of same Article, so that if a majority (3) of the judges shall agree on one man he shall be awarded first rank. If no decision is reached by this means, the average of the *five* (5) judges shall be obtained and first rank thus decided. The second rank shall be determined in the same way. A vote of thanks to the Officers and Judges was moved and carried.

Moved to adjourn. Carried.

D. P. JONES,
Secretary.

CONSTITUTION.

ARTICLE I.—This organization shall be known as the NORTHWESTERN INTER-STATE COLLEGIATE ASSOCIATION, and shall consist of the Collegiate Associations of Illinois, Iowa, Wisconsin, Ohio, Indiana, Minnesota, and such other State Associations as shall be admitted by a two-thirds vote of the delegates present at any annual convention.

ARTICLE II, SECTION 1.—The object of this Association shall be to hold contests in oratory, and such other literary contests at such times and places as shall be decided upon by the Association at its annual convention.

SEC. 2. In the contests of this Association, each State shall be represented by the successful competitor in its annual contest; *provided*, he be an under-graduate of the collegiate course at the time of such State contest.

ARTICLE III, SECTION 1.—The officers of this Association shall consist of a President, Vice-President and Secretary (who shall also be Treasurer), who shall constitute the Executive Committee of the Association. All nominations of officers of the Association shall be by informal ballot, and an election shall follow by ballot upon the three names receiving the highest number of votes, a majority of all votes cast being necessary for a choice.

SEC. 2. The officers of the Association, on their retirement from office, and ex-orators, shall be honorary members of the Association.

ARTICLE IV, SECTION 1.—It shall be the duty of the President to preside at all meetings; and he shall also have power to call a special meeting at the written request of four State Associations, giving at least thirty days' notice to each State Association of such meeting.

SEC. 2. The duties of the Secretary shall be such as are common to that office, and any other duties that the Association may authorize. He shall have printed 600 copies of the Constitution and shall send 100 copies to the Secretary of each State Association. As Treasurer, he shall keep the accounts of the Association, and pay all bills audited and

allowed by the Executive Committee. He shall be required to deposit, with the President of the Association a bond for \$1,000.

SEC. 3. The contests of the Association shall be under the control of the Executive Committee. It shall be the duty of the Executive Committee to audit all accounts before they are presented to the Association.

ARTICLE V, SECTION 1.—Five persons shall be chosen each year by the Executive Committee to act as judges of the literary contest of that year; and each State Association shall be notified of their appointment at least sixty days before the contest.

SEC. 2. The judges shall not, in any way, be connected with the institutions represented in the contest.

SEC. 3. Any judge shall be removed upon the protest of any State Association, made in writing, within thirty days after his appointment, the reason for such protest being given in writing; *provided*, no State shall be allowed more than two protests.

SEC. 4. Each judge shall, without consultation, decide upon the merits of the thought, composition, and delivery of each oration, marking each of these particulars upon the scale of 100, after the delivery of the oration.

SEC. 5. Six copies of the manuscripts of the competing orators shall be printed and handed to the President of the Association, and by him to the judges separately, at least three days before the contest, who shall read them before their delivery.

SEC. 6. At the close of the contest, the President and Secretary shall receive the average of each judge for each contestant. The averages of each judge shall be graded 1, 2, 3, 4, etc. The orator graded first by a majority (three) of the judges shall be awarded the first prize. If no orator is thus graded first, the averages of the five judges shall be averaged, and the orator receiving the highest average shall be awarded the first prize. The first prize having been awarded, the averages of the remaining orators shall be again graded 1, 2, 3, 4, etc., and the second prize determined in the same manner as the first. The President shall then announce the result. The markings of the judges shall be published in, at least, one daily paper.

ARTICLE VI.—In the contests of the Association, no oration shall contain more than two thousand words.

ARTICLE VII, SECTION 1.—The annual convention shall meet in the afternoon of the day on which the contest is held, and the following day in the forenoon, in which convention each State shall be entitled to three votes.

SEC. 2. No delegate shall be entitled to a seat in the convention whose credentials shall not have been signed by the President and Secretary of State Association.

ARTICLE VIII.—Any State of this Association failing to send a representative to any annual contest, without furnishing a satisfactory reason, shall be excluded from the Association.

ARTICLE IX.—The names of the orators engaged in the contest, and copies of the orations, also the names and markings of the judges, shall be kept on record by the Secretary.

ARTICLE X, SECTION 1.—This Association shall pay all necessary expenses connected with the contest, including prizes, and all necessary expenses of judges, the President and Secretary, and of the Vice-President when acting as President.

SEC. 2. Such an admittance fee to the Oratorical Contest shall be charged as the Executive Committee shall deem proper.

SEC. 3. Each State Association shall, at least thirty days before the Inter-State Contest, deposit with its Treasurer the sum of \$25, which shall be subject to an order from the Executive Committee. Any State Association failing to comply with this provision, without sufficient reason being given, shall be denied representation in the next contest and convention.

SEC. 4. Within ten days succeeding each annual contest all surplus funds shall be divided equally among the State Associations and be deposited with their respective Treasurers. Should there be any deficit, it shall be met with an equal tax upon the State Associations.

SEC. 5. * As Testimonials of success in the contests of this Association there shall be awarded as first honor, *seventy-five dollars*; as second honor, *fifty dollars*.

ARTICLE XI.—The Constitution may be amended at any annual meeting of this Association by a two-thirds vote.

The markings of the judges and referee, at the Indianapolis contest, were as follows:

| JUDGES. | C. E. Jefferson, of Ohio. | W. W. Clark, of Minnesota. | A. J. Cravens, of Iowa. | H. S. Fiske, of Wisconsin. | F. G. Hanchett, of Illinois. | C. L. Goodwin, of Indiana. |
|----------------------------|------------------------------|-------------------------------|----------------------------|-------------------------------|---------------------------------|-------------------------------|
| Judge J. S. Frazee | 99 $\frac{1}{3}$ | 99 $\frac{2}{3}$ | 98 | 98 $\frac{2}{3}$ | 98 $\frac{2}{3}$ | 95 $\frac{1}{3}$ |
| Hon. N. C. Butler | 87 | 93 | 93 $\frac{2}{3}$ | 88 | 95 $\frac{2}{3}$ | 93 $\frac{2}{3}$ |
| Rev. O. C. McColloch | 75 | 88 $\frac{1}{3}$ | 91 $\frac{2}{3}$ | 70 | 83 $\frac{1}{3}$ | 90 |
| W. P. Fishback | 91 $\frac{2}{3}$ | 80 | 91 $\frac{2}{3}$ | 95 | 96 $\frac{2}{3}$ | 93 $\frac{1}{3}$ |

The orations we print in full, below. After settling all accounts of the contest there was a small balance left in the treasury.

THE OLD AND THE NEW CIVILIZATIONS.

BY F. G. HANCHETT, UNIVERSITY OF CHICAGO, CLASS OF '82. FIRST HONORS.

There is a tendency in man to swing, pendulum-like, from extreme to extreme. We can trace it from the individual with his hobbies and eccentricities to the masses with their ever-varying and unreliable public opinion. We can mark it in the more slow and steady sweep of thought from century to century, and from age to age; in the alternate succession of days and nights of civilization—dark ages and golden ages of light. It is this tendency in man that accounts for the two opposite extremes of *what we term* the old and the new civilizations—the civilization tha

dazzled the world with the Golden Age of Greece, and the civilization of which the nineteenth century is but the morning light; the civilization which recognized the *spiritual* Plato as the supreme monarch of thought, and the civilization which crowns the *practical* Bacon as the greatest philosopher of the world—eras which may be distinguished as the Age of the Beautiful and the Age of the Useful. This old civilization was a magnificent garden, in which the Beautiful, the Spiritual and the Ideal were cultivated with the choicest care, and in which the Useful, the Material and the Practical were rooted out as rank and unsightly weeds. From this well-tilled soil grew and blossomed poetry, from whose fragrance the poets of all ages have drawn their sweetness; eloquence, whose unrivaled periods still ring in our ears; architecture, which has ever been the model and marvel of the world; sculpture, to whose divine beauty our boasted age still bows in admiring worship. But with however much of admiration we may look back upon the glorious achievements of these old Greeks, we must still admit that they went to the extreme in their cultivation of the beautiful and neglect of the useful. Their philosophers scorned the idea of debasing their knowledge for the advancement of the useful arts. They had famous sculptors, but bungling mechanics; splendid rhetoricians, but stupid doctors; dreams of delightful repose in the Elysian fields, but no vulgar vision of spring mattresses on this side of the Acheron. Steam might have lifted the lids of tea-kettles before the eyes of these old dreamers for endless centuries, but railroads would still be unknown. To their imaginative minds the thunderbolt told no tale of the telegraph, but was the rattling of Jove's chariot-wheels over the golden pavements of Heaven.

In the fullness of time there came into the fields of thought a practical husbandman, Francis Bacon, who was not satisfied with mere *flowers*, which, however beautiful, could but please and adorn; but desired "*fruit*" which could supply the more necessary wants of man. He, therefore, left this old garden of beauty, and in far broader fields scattered the seeds of a philosophy which was destined to bring forth rich harvests of usefulness. The fruits of this great philosophy have ripened into what we call the practical age—an age which with equal propriety might be termed the age of miracles—an age in which thought busies itself with the great problem of benefiting the condition of man—an age in which the hidden secrets of God have been found out and man's powers invested with the powers of omnipotence, until his feeble voice has been made to echo across continents and his thoughts to pass beneath the billows of the deep—an age in which the petty quibbles of metaphysicians are accounted secondary to the great inventions that lessen the burdens and perplexities of life—an age in which the poet who is contented with picturing the outer manifestation of things has been displaced by the scientist, who delights in searching out the inner secrets of the universe. But nowhere have the glorious triumphs of this age taken more practical form than in the modern home, which, crowded with the countless comforts and conveniences of life, is a veritable heaven in comparison with the palatial but empty abodes of the Golden Age of Greece, or the turreted but desolate castles of the senseless age of chivalry. In fact, the Nineteenth Century is one sublime and bewildering panorama of practical achievements.

In keeping with that tendency in man which carries him to the extreme, we observe that the same causes which have produced such great practical achievements have also produced a practical and material spirit in the age, which tends to dwarf and deaden the very noblest sentiments in man's nature. In the fields of modern thought the coarser plants of material prosperity have so overshadowed the more delicate flowers of poetry that they have made but a feeble and spindling growth. This spirit of the age would prize electricity more than immortality, and look with more pleasure upon a man-made machine than upon a God-inspired sentiment. It is a significant fact that all of the greatest poets lived before the age of material prosperity; that the genius of this age is drifting into the channels of trade, and instead of a Shakespeare, a Milton or a Raphael, we have an Astor, a Jay Gould or a Vanderbilt; that our scientists return from their search for the useful in the world of matter with their eyes spiritually blinded. These things point to the fact that our practical age, with all its boasted blessings, by absorbing the mind with the baser truths of matter, is disqualifying it for the higher truths of the spiritual. This modern materialism has swung to its maddest extreme, and taken its most definite form, in its attack upon religion. Puffed up with his meagre knowledge of one small world, little man attempts to prove that there is no God in the great universe. We are told that man has no soul, that immortality is but an empty dream, and religion but the sickly child of ignorance and superstition. Thus would our age, with its material clutch, strangle the very divinity in man and leave him but the monarch animal of the world.

Physical science is the idol of the age, and the man who has, perchance, found a few bird tracks in some antediluvian rock, is an illustrious hero. With what profound wisdom we have discovered that the first horse had five toes! How wise we are for having learned that there are 90,000 species of beetles, and possibly more! But is there no mental science? Was he right who asserted that, "as the liver secretes bile, so the brain secretes thought?" "Can the scientist lay open our moral structure with his dissecting knives." We do not forget that our age, "which draws its water from wells that are sixty centuries deep," by the natural laws of progress, is in the advance of every preceding age; but we criticise the extremely practical and material tendency of our age, which has produced a large class of narrowly practical men — men who see utility only in that which ministers to their immediate and physical wants; who are devoted soul and body to business, for the transaction of which they have become mere machines; who consider poetry and religion as fit only for women and children; men who are forever crying, in the language of Dickens' Gradgrind, "In this life we want nothing but facts, sir, nothing but facts;" men whose imaginations, the wings of the soul, have become so heavy with the mud of the material things in which they grovel, that they can never soar into the lofty regions of thought, where man asserts his kinship with heaven and suggests that he has an immortal soul. Better be a philosopher and live in a garret, better be a poet and an heir of poverty, than one of these narrowly practical men surrounded with every comfort and luxury that the nineteenth century can offer.

Thus we see that what we term the old and the new civilizations have:

been the extreme developments of opposite ideas. Happy will be that age, if it may ever dawn upon the world, when the central idea of these two civilizations shall be wedded in harmonious equality, when the love of the beautiful and the love of the useful shall each have its designed place in the symmetrical development of man; then shall he have the poet's eye to see all the varied beauty in nature and in sentiment, and the keen perception of the scientist to search out all that is useful to man in the hidden secrets of God.

THE CAUSE OF THE GRACCHI.

BY ARTHUR J. CRAVEN, STATE UNIVERSITY OF IOWA, CLASS OF '82.

SECOND HONORS.

Ideas, not swords, have filled the past with ruins. Rome was not destroyed by barbarians. True, they captured and pillaged and destroyed a city whose name was Rome; but the fair mistress of the world, the pride of her children, had long been dead, and when the lands of the North stretched out their strong arms to seize a bride they embraced a corpse.

Ideas, not swords! And among the ideas that scourge mankind none is more potent than that of man's inequality,—asserting that men are *not* of the same blood, that we are *not* free and equal, that I shall be king and you shall be slave. It sounds the tocsin of war on the world's battle fields. It is the great Goliath of history, striding through the centuries, overturning kingdoms, obliterating empires, challenging republics; but no youthful David with sling and stone has yet stepped out from the ranks of the people who can slay and behead this giant of tyranny. As Americans we boast that the Declaration of Independence was his death-warrant, and that our political fabric towers high above his grave. But whence comes this cry of monopoly and the warnings against centralization? Is it merely the wail of human discontent? Are not the rich becoming richer and the poor poorer? Does not monopoly dip its hands into every bushel of wheat—yea, even into the standing grain? The tattered children of poverty, nursed and swaddled in the deadly shade of corporations, tugging at the skirts of their mothers for bread,—are they really hungry? In the dreary past, you say, cloud-crowned pyramids and mouldering ruins of lofty cities whisper of slavery. In the battle-fields of yesterday, we see the victory of human rights. Yes; but this bloody monster of inequality rises from its very grave. Formerly it was serfdom, now it is monopoly; yesterday it was slavery, to-day it is centralization. Take away its part from the long drama of history, and the play has lost its meaning. Exterminate this principle from the politics of to-day, and you relieve our statesmen of half their cares. Agrarian reformation derives its importance not merely from its tragic interest in history, but from the fact that it is strangely applicable to present politics. History, with all its ceaseless repetition, has resurrected from the buried past no problem of such continual importance as the use, rent, and

ownership of land. The past resounds with the tread of soldiery, the cries of slavery and despotism; but exclusiveness of land possessions is the basis of conquest, the foundation of slavery and revolution, the very corner-stone of despotism. Wide-stretching acres made the lords of feudalism; serfdom is the product of tenantry. Ireland to-day, with her rags and her stripes, is the sad epitome of agrarian abuse. Land, indeed, is *real* estate. It endures, though government and race be swept away. It fosters conservatism. It checks revolution. It gives courage to patriotism. Mercenary troops have won few victories. From the firesides in peril stretch the mystic chords of sympathy along which flit messages that spur trembling armies to victory.

It was this importance of land ownership as a factor of patriotism which filled the mind of Tiberius Gracchus. On his journey to Spain, as an emissary of the Roman Government, he clearly saw the dark cloud of imperialism drifting over the desolated fields of Italy. The small land-owners had been driven out. Their homes and mortgaged farms had been seized by the centralizing hand of the rich. With their homeless families they had sailed across the seas to the colonies, or had fled to Rome to join the ranks of an idle army, or swell the hungry multitude which fawned at the feet of ambitious demagogues, and sold their votes for bread. Honest toil had lost its incentives. Free labor could not compete with the drudgery of slaves. Slave gangs of stammering barbarians looked sadly from the fields upon the crowds of free laborers flocking to the city. Homes were dear, but what were all the pleasures of domestic life compared with the terrors of serfdom? One way, and one way only, led to distinction and glory; and that lay over the bloody corpses of battle fields, or through the passions of the forum. Rome was the center of the world. Her returning armies came back with standards of victory. Long processions of triumph, glittering with the spoils of conquest, were marching beneath her arches. Philosophers and teachers endowed her with knowledge. The forum was hushed by the spell of eloquence. Her streets were thronged with strangers. But the surrounding fields yielded scanty harvests to the labor of slaves, and over the proud hills and lofty domes of the city hung a cloud of famine which neither sunshine nor breeze could ever dispel.

The very causes which contributed so largely to the renown and outward strength of the republic were hurrying it forward to a speedy decline. Increase of conquest made an increase of captives. The slavery of the captive destroyed the liberty of the freeman. And as farther and farther the tread of the Roman legions advanced through surrounding nations, when far in the East the boundaries were marked by the line of Roman spears, when their standards were raised beyond the Alps, and Roman sails fluttered in every harbor, the broad Mediterranean was freighted with living cargoes, and Rome became the slave market of the world. Her great men boast no more the love of country. They count their money, measure their domains, dress forth their banquets, awake the lyres and timbrels, and with floods of ripe Falernian drown the little left of virtue. The laws, the laws of common right, the guard, the wealth, the honor, the safety of the nation,—who has sold them, defaced, and corrupted them? Why do they guard the rich man's cloak, and tear the

poor man's garment from his back? Why are they in the grasp of wealth a sword, and in the hands of poverty a broken reed?

On a heart warm with patriotism, this political condition could not fail to make an impression. On this journey to Spain Tiberius resolved upon the agrarian reform which determined his career. On the summits of the mountains fringing the northern border he paused and looked back upon Italy. Below were the plains which lately bloomed with the happy homes of peasantry. Away in the distance rose the outlines of Rome. There was his home of royalty,—his father, the consul; his mother, Cornelia, the daughter of Hannibal's conqueror. There he was the petted favorite in the most distinguished circles of aristocracy. There he was taught and trained by Rome's greatest teachers and orators. There he had married the daughter of Appius. There, indeed, lay the path of glory; but it was paved with the oppression of the weak, and wet with the tears of the poor. In the valleys wandered the stepsons of Italy. On the breeze was borne the clamor of the rabble in the distant city. And there on mountains looking down on a land rendered sacred by the memory of his fathers, he closed his eyes upon visions of wealth and formed his plan for the relief of his country—a plan as stainless and as pure as the snow which crowned the mountain-peaks above him.

In the crowded forum behold the sad tragedy of republics. On the one side iron-fingered monopoly, with its deeds and its bonds; on the other a nation of beggars pleading for bread. Tiberius rises from the side of the aristocrats and demands that a law already passed should be enforced; that the lands of conquest which Rome had provided for her beggared children should be wrested from the hands of wealthy usurpers and distributed to those for whom they were designed; that a commonwealth of small land-owners would prove a balm for pauperism and make a bulwark as strong as adamant against centralization. He is scourged and mangled by that maddened aristocracy, and finds his grave in the sands of the Tiber. A brother grows to manhood, and rising in that same forum pleads for poverty, and his lifeless head is held before the gaze of the multitude and rolled at the feet of his mother. Go, seek for the sorrow which bears the dregs of grief, where tears are relief and breaking hearts are voiceless, and you find it not with the warrior counting the loss of the battle; not with Napoleon, standing lone and pensive at St. Helena, gazing above the raging billows toward sunny France; but go rather where Rachel is weeping, where Cornelia, the Niobe of Rome, asks no greater comfort than that the world, that history, should only call her the "Mother of the Gracchi."

Volumes have been filled with the results of the failure of her martyred sons. True, it is only the wind that plays with the idle leaves, but it heralds the tempest which will rend every fiber of the forest. The sculptor carves his marble and the poet weaves his verse; but the deadly virus courses through the veins of the state. The vulture of destruction broods over the imperial city and perches upon her lofty pinacles. Murder strides through senate halls and creeps with drawn daggers to the bedside of sovereignty. Virtue gathers her spotless robes and flees. The palace of marble overshadows the lowly hovel. The tread of armies wakes the echo of civil discord. The rivers are stained with the blood of

those who lately toiled along their banks. On the peak of the mountain frowns the fortress of the noble; on the plain below, in all the pains of serfdom, toil the subjects of the empire.

Almost two thousand years have rolled on. Time has wrought his mighty changes. The kind face of old Mother Earth has grown scarred and worn by the care of her quarreling, restless children. Civilization has fled from her cradle in the East. She has plowed the continents and sailed the seas. Here, under western skies, she has built her cities and raised her monuments. To-day we wander back and search for the footprints of her youth. Every mound is sad with its story, every ruin speaks; but none more plainly or solemnly to this Republic of the West than the columns and temples crumbled and decayed because the cause of the Gracchi was lost.

THE NEW EMANCIPATION.

BY C. L. GOODWIN, INDIANA UNIVERSITY, CLASS OF '83. THIRD HONORS.

There have always been men who could be convinced only by the irresistible logic of events. They are the men who are acted upon. Their minds are the lifeless, inorganic rock, so moulded and hardened into their surrounding, that only a volcanic force can tear them from their beds of superstition and prejudice. Every change in human opinion, every revolution in human action, is opposed by the same class, is fought on the same ground. In the inauguration of every form, humanity has been lashed around the same old circle of miserable expedients, no matter how inconsistent those expedients may be, no matter how often they may have been defeated. They are brought forward by a class, which, like the hand-organ man, without regard to time or situation, grinds out the same old tunes, unceasingly and unchangingly. This class are the stones with which tyranny has always built its fortresses. They nurse every old custom, resist every innovation, and feeling, perhaps, that "nothing in the earth, or in the waters under the earth," is adequate to the defense of such a position, always draft Divinity as a reinforcement. They were the men who believed in the Divine right of kings, who justified slavery by Scripture, and their legitimate successors are to-day fighting against the suffrage of woman.

Why are women not permitted to vote in our country to-day? We boast of a government founded on the consent of the governed—a government in which the humblest is entitled to a voice. We say that every citizen shall take part in making the laws. Woman composes nearly half the population. She is a citizen. She is taxed. She is held responsible for crime. She is admitted to be capable of making a sensible choice. Why is that part of the population, which is man's equal intellectually, and superior morally, thus accorded no more recognition in politics than you grant to an idiot or a convict?

It is said that women are represented amply by their husbands and fathers. Wonderful philosophy this! A representative who is born in office and holds it without the shadow of a responsibility! A representative who forms the opinions of his constituents and expresses them to suit *himself*.

We are told that, in all ages of the world, the family has been the model of government, and the head of the family has been its ruler. It has been, indeed, a model of government, a model of the vilest despotisms that ever trod upon an unfortunate people, and the most tyrannical wretch who ever held a scepter power has claimed to be a father to his people. A hundred years ago, our government announced that in this land the rights of the individual were of the highest importance, and since then our flag has waved a welcome of freedom and happiness to those who have fled from the kindness and the family ties of this paternal form of government.

And why do they tax the language so heavily in describing the loftiness of "woman's sphere?"—a sphere which has the remarkable peculiarity of being a delightful situation in which no man is willing to be placed. It has not been shown that this sphere is less compatible with voting than man's "sphere."

In this heterogeneous homogeneity of argument, in this harmony of discordant propositions, a leading place is occupied by the argument that woman should be denied the right of suffrage because she cannot bear arms. Regardless of the fact that this principle would exclude from suffrage a great body of intellectual men, it is said that woman does not help to carry on a war. She does not march to the front, it is true, to the stirring music of the fife and drum. Hers is the unpretentious part—watching the weary hours away in the tent of the wounded, soothing the pain and giving encouragement and hope—holding a brave heart in the silent watch by the bed of death—at home sustaining an army by her toil, her tired heart beating the dull round of care and anxiety, quickened and sustained by no warlike music.

There is a feeling that the possession of the ballot will take away the refinement we so much admire in woman—that it will destroy in some way the tenderness and the delicacy of home. But the women affected by the exclusion which this objection intimates are comparatively few in number, and are, at best, sickly exotics, shut out from all our joyous, bounding national life. But even could these see something of life in its hundred different phases, is it likely that the sweetness and purity of home would be less appreciated by a knowledge of the emptiness of all beyond? Do knowledge and mental power take away refinement? Is gold less pure that it has stood the test? Is a flower less sweet that it is able to blossom in the sunlight? And of the vaunted indifference of women to this movement, it may be said that they who by fortune are lifted out of the great struggle for existence, may regard the movement with a careless eye. But what of them who are compelled to go forth in weakness and ignorance and toil from day to day, and who meet at every turn the iron barriers of discrimination? The appeal is from the voiceless sufferings of the great under-classes.

Their every argument is an argument against universal suffrage. Their every argument is on the principle of a qualification for suffrage, a principle which would take the mite from the poor and weak and give it to the hoarded wealth of the more powerful. And if you will take the line of argument employed by the defenders of slavery and that employed against the suffrage of woman, you will be impressed by their striking similarity.

They said that the master represented the slave, and these say that the husband represents his wife. They said that the negro was perfectly satisfied with his condition, and did not want to be burdened by the discouragements of freedom; and these say that woman is content to be a mere accessory to man's convenience, and does not desire the trouble of voting. They expatiated on the delights of slavery, and these linger on the unapproachable felicity of woman's position; and, as a fitting climax, both find it necessary to claim the sanction of Divinity. The arguments which they use are veterans which have grown gray in the service of tyranny. They have fought every battle by which the few have tried to oppress the many. And in every battle their banner has gone down before freedom and progress.

Our government is but the essence of the combined opinions of its people. Every wish, every sentiment, every opinion should enter in some degree into its composition. Its different forces are mutually restraining, and the more perfect the representation of its various elements in their proper proportions, the more perfect will be its equilibrium, and just in the degree that some of its elements fail to be represented, will the government be defective and one-sided. And may not the evident defect in our politics be due to this lack of a full representation? Why has our political arm rotted, while in every other branch of our national existence there has been a splendid growth? In every institution in which woman has taken part there has been an advancement; and in politics, from which she is shut out, there has been only corruption and decay.

In the streets of ancient Athens, through which women were not permitted to walk, there stood sculptured figures which, if set up in our streets, would be crushed to powder by an indignant populace. On the stage of Beaumont and Fletcher, on which women never gazed, there were utterances so foul as scarcely to be mentioned, and were an attempt made to present them on our stage it would be stopped by the tremendous force of public opinion. In the streets of our cities, in the theatres of our day, you find gentlemen—instead of animals gratifying their beastly instincts. And in the literature of to-day there is nothing that is not lofty and pure. The difference lies in this, that the Grecian sculptor did not chisel for her gaze, and the early dramatist did not write for her reading. And the discrepancy in politics is that politicians do not scheme and bribe under the direct cognizance of woman.

The sexes are mutually sustaining. Their co-operation is necessary to the completeness of any work. Wherever man has attempted anything alone, or wherever woman has attempted anything alone, the result has been more or less a failure. Wherever man has been deprived of the society of woman he has invariably sunk, in manners and in morals. A nation's treatment of its women is the barometer of its civilization. Every admission of woman to an equal participation in any institution has been marked by its purification. What she has done for literature and for art, she can and will do for politics. Cramped as she has been, held down by the weight of educational discrimination, she gave a noble impetus to the abolition of slavery, and she has made it a disgrace for man to be seen drunken upon the streets. Let women go to the polls, and disorder and *debauchery* will vanish at her coming. Not that woman is better than

man, but by reason of that mysterious influence which the sexes exert over one another—an influence which is the pride and glory of the race—the arch on which civilization is built.

It will not be denied that women have influence; an influence that will increase, now that she is permitted, equally with man, to traverse the fields of the higher education. As brain comes in contact with facts, thought is evolved and must find a vent. In the past, thrones have rocked and fallen from the force of imprisoned thought struggling up to light. And in Russia, to-day, the repressed thought of its people threatens to burst all barriers and to lose the domes and pinnacles of old institutions beneath the surface of a trackless sea. Though the increasing influence of women in our politics may work no convulsion in our institutions, it will, at best, dissipate itself in petty and useless ways, the result of ignorance and non-recognition. Would it not be better to educate this force, and make it responsible by giving it the ballot, than to let it drift thus, pilotless, upon the political seas?

Give room to her energies. Let her do missionary work among the political heathen, by going to them, and not simply by sending tracts from afar off.

Give her at least an equal chance in competition for wealth and power. Let her soul out into the grand sunlight, out of the enclosing walls of discriminating customs, and it will expand into a wondrous beauty. Let her be given a training that will take her out of the range of your pity, that will enable her to command justice, instead of begging for it. The ballot will cause her to think, will utilize and direct her knowledge, will enable her to aid in the formation of a public opinion which will recognize her as a human being. In such a position the stories of her wrongs, of her unequal struggles, of her soul narrowed by oppression to a petty part, of her unsatisfied yearnings toward the broader fields of action, will be forever hushed. We will stand in the presence of the representative woman of the future, a woman in whom a knowledge and a strength of character that will enable her to protect herself are blended with all gentleness and purity.

The advocates of this cause have fought a good fight. Nor is such heroism displayed in support of a myth, in upholding an unworthy cause. It is not amid the sublime thunders of an Austerlitz that human greatness is seen in its most enduring splendor, but in the calm patience and hope which, under danger and defeat, sustain a starving army through the winter of a Valley Forge; and out of the indifference of those to whom the cause should have been most dear, out of the scorn and coarseness of the rabble, out of the ridicule of the press, which has made them a mockery and a jest, the adherents of this cause have stood and upon them has rested the light of an unfading hope.

Though barbaric customs rest still heavily on the American woman, and though she is to some extent locked in the fatal stupor of indifference, she has advanced from the right of holding property in her own name to a share in the higher education, and is gathering from its heights the garlands of science, philosophy and song.

There is in our land a spirit which welcomes the oppressed, "no matter in what language his doom may have been pronounced; no matter what

color an Indian or an African sun may have burned upon him." It is a spirit which needed no precedent to dethrone a king, to fling defiance at a mother-country, to liberate millions of slaves. It is a spirit which says that no race, class or sex, I care not how wise or how virtuous it may be, has a right in this land to govern any other. It is a spirit which, with a certainty as fixed as the great star which watches our northern hemisphere, will give to the political intelligence of woman a recognition and a voice.

THE JEWS.

BY W. W. CLARK, UNIVERSITY OF MINN., CLASS of '82.

From the beginning of written history the life of the Jew has been that of a wanderer. He has been tossed about from one resting-place to another, driven from the enjoyment of one home to search for another, has mingled with all peoples, in all climates, in all times. Nations have sprung up, grown to maturity, waned and died. Races have been remoulded and blotted from the face of the earth, yet throughout the advance of years the Jew has retained his individuality, his intellectual qualities and his religion. As we look back through the mist and darkness which we have traversed to our present position in the full blaze of civilization, the path of the Jew can be traced by a continuous line of light, extending down through all the ages, however dark and obscure, from the dawn of human progress to the present day. When the night of barbarism drew down his mantle of darkness over the whole world, the Jews alone retained their former civilization, and in this we find their greatest eulogy. It is easy for a nation to be borne along with the tide, but their true strength and manliness is shown in stemming it. The Jews shared in the golden ages of Egyptian, Grecian and Roman intelligence; but when the contrary current of ignorance and superstition set in, and swept the nations of Europe back centuries in the path of progress, the Jews boldly resisted the flood and were not forced back one step from the point they had reached by their previous centuries of exertion. And hence we find that while the monks of the West were spelling out their liturgies, and kings could not write their names, Jewish professors were lecturing on scientific, political and ethical subjects; while the priests were trying to reverse the laws of nature in the practice of miracle cures, the Hebrew doctors were studying these laws in their laboratories and laying the firm foundation of our present system of medicine. The Jews carried on the trade of the world; their doctors and financiers were unrivaled; their universities were established in every country, and their libraries have never been surpassed. It was impossible for this intelligence to come in contact with the surrounding superstition without dispelling it, and we have Draper and Mosheim for authority, that to the influence of the Jews, more than to any other, was due the revival of learning. The light of the law which descended to the Jews amid the thunders of Mt. Sinai has

spread from tribe to tribe, from nation to nation, from continent to continent, until the whole civilized world is swathed in its glory and the Mosaic code has become the central sun in its system of jurisprudence. Jewish sculptors and artists have held the world spell-bound with their delicacy of touch, their power of execution, and their grandeur of conception. The strains of sublimest harmony which welled up from the depths of the Jewish soul have lived on and will live on forever, soothing the troubled mind with their tenderness and depth of pathos, or thrilling the soul with the loftiness of passion. The Jews were our factors and bankers before we could read or write, and in all times their statesmen have won high positions by the able and energetic execution of the trusts placed in their hands. The names of Mendelssohn, Auerbach, Neander, Disraeli and Gambetta will stand worthily side by side with those of Beethoven, Dickens, Gladstone, Macaulay and Thiers. We admit that the Jews have, like other men, their faults, and there is one dark page in their history, one fatal mistake, the crucifixion of our Savior. But consider the cause that led them to that step. The unity of the Godhead was the very foundation of their religion; when Christ taught the trinity, and placed Himself on an equality with God, it seemed in their minds to be blasphemy against their sacred religion. Again, they had been waiting long and patiently for the coming of a king sent from God; as generation after generation of bondage was added to the long line of similar centuries, their imagination, urged on by their intense longing for liberty, formed for them pictures of freedom, of self-rule, of happy homes unfettered by the iron hand of oppression. Cherished next to their God, these hopes, so simple, and yet so noble, had become a part of their very lives; imagine, then, the bitterness of their disappointment when Christ came, bearing with Him no scepter, and offering no temporal deliverance. The motives of their action are found in the two grandest and noblest passions that can fill the soul of man—love of liberty and love of God—the same passions that in the Huguenots and our Puritan Fathers called forth our highest eulogy and most fervid admiration. Let us, then, for the sake of Him who suffered most, accept His verdict, as in the agony of the hour He uttered those words of mercy, "Forgive them, for they know not what they do."

How bitterly has this one crime been expiated! Scattered over the face of the earth, for eighteen centuries they have been the victims of the ignorance, fanaticism and calumny of the world; for eighteen centuries they have endured the storms of persecution, disdaining to violate their own consciences, because they feared the wrath of God more than of man, and loved truth more than life. What nobler or sadder sight can there be than a people martyred for principle, homeless and defenceless, trying to wear out the power to inflict by the patient endurance of suffering? The story of their misery is a long one, and would fill volumes; the history of every European country is stained with Jewish blood. In Germany they were at first treated with moderate toleration. However, this was not long to last; at the close of a summer's day, as the Jews were preparing for their evening devotion, a cloud of dust appeared and obscured the setting sun. It draws nearer, nearer yet; loud shouts, the clash and clang of a mighty army are heard, and immediately the devas-

tator is upon them. Erasing from the Decalogue the two commandments, "Thou shalt not steal," "Thou shalt not kill," the crusaders scatter themselves throughout the Jewish quarters and begin their terrible work of slaughter and pillage. The lurid flames send up their forked tongues and lend a horrible brilliancy to a horrible scene, the night is filled with the agonized cries of the Jews, and the harsh, merciless shouts of their persecutors. When the gray of dawn appears, behold the change! In place of yesterday's happy homes and busy marts, there is left but the monotony of charred timbers and smoking ruins. Mangled bodies blockade the streets, and thousands of them float on the bosom of the Rhine. Drunken with sensuality and laden with spoil, the crusaders have passed on to greater outrages at Jerusalem; having conquered this city, they drive the entire Jewish population into their synagogues and apply the torch. When the last shrieks of the burning inmates have been stifled by the fiery hand of death, Godfrey and his followers turn to Mount Calvary.

But to Spain was left the culmination of Jewish persecution; Moorish supremacy yielded to Christian, and the Inquisition was established. I will not enter on a description of its horrors; the rack, the thumbscrew and the virgin remain to us as mute but terrible witnesses of the cruelty that has been. Hideous as were the crimes of Nero and Mary Tudor, they seem as nothing compared with the misery heaped upon mankind by the tender white hand that signed the edict expelling the Jews from Spain. Little pity had Isabella in her heart for the Jewish maidens, deprived of home and friends, who preferred graves in the waters of the Mediterranean to disgrace at the hands of her soldiers; little pity had she for the eight hundred thousand souls, half-clothed, half-fed, crowded into the holds of vessels, weak and sick from the pollution they breathed; little pity for the mothers and babes dying beneath the scorching rays of an African sun.

And to-day the outrages committed against the Russian Jews rival in atrocity those of Spain in the palmiest days of the Inquisition. Germany, the home of intellect and liberality, proud of her rank in the vanguard of civilization, has deliberately unearthed from its mediæval grave that monster of bigotry, Jewish persecution. And now from the valleys of Germany and the plains of Russia, there rises a despairing cry to the Lord God of Sabaoth, "How long, O Lord, how long?" As we contemplate their present misery and look back over the long line of centuries so pregnant with Hebrew suffering, so filled with their earnest labors in the arts and sciences, as we think how much they have suffered and how little they have complained or retaliated, as we remember that their virtues are their own and that their faults have been forced upon them by eighteen centuries of the bitterest persecution, as we compare their noble bearing throughout their long and terrible ordeal with the brutal fanaticism of our fathers, we blush with shame and feel that every drop of blood that followed the Christian's sword from the Hebrew's wounded breast cast a crimson stain upon the annals of Christianity which the advance of years can never efface. If the walls of Jerusalem could picture the massacres they have seen, if the smoke-stained ruins of the Jewish synagogue could reproduce the shrieks of their burning inmates, if the Rhine and the

Thames could bear upon their bosoms the mangled forms of murdered Jews that their currents have swept to the sea, if the dark dungeons of the old Inquisition towers could tell the long sad story of the misery they have witnessed, if the myriads of Hebrews who have given up their lives rather than their religion, could rise from their graves into a mighty army, then, and then only, could we comprehend the depth of wrong, the immensity of outrage that has been heaped upon the Jews by the fanaticism of our fathers. If they had come forth a nation of criminals and idiots they would have stood as a living monument to mark the brutality of the followers of a gospel of mercy; but the indomitable strength of manhood, which the might of Egypt and Babylon failed to crush, the intelligence which made them first to leave the mazes of Polytheism and raised Europe from her grave of ignorance, has not forsaken them, and to-day as intelligent men they stand up at the bar of justice pleading for their rights, pleading for that birthright of all men—liberty of conscience and freedom from oppression. In denying them this we are their oppressors; we, the followers of Christ, who hold that the love of God is best shown by the love of man. O, Christian men and women, let not our acts belie our words; let us remove from their bleeding shoulders the yoke of persecution, break the sword and quench the firebrand; let us give them their just place as men among men. And when this glorious work shall be done, the voice of thousands upon thousands of grateful Hebrews will burst forth into a mighty anthem of praise and glory to the God of Christians and Jews.

THE COMMON MAN.

BY C. E. JEFFERSON, OHIO WESLEYAN UNIVERSITY, CLASS OF '82.

The universe was built for a purpose. Every purpose has a plan, every plan a development. Development means progression. In the natural world God moves in silence, and with equal step. Nature hangs out a star, unfolds a flower, paints a gem, to tell she is not idle; but she never stops to shout her triumphs, nor loiters in chagrin or fatigue. Not so in the moral world. Free will, like a wanton child, toys with the will of heaven, chafes and frets; rolls the stone of Sisyphus, fills the sieve of the Danaides, laughs at the eternal tides, rages and sleeps, rushes toward the light, and, growing weary, buries itself in darkness. Amid tumult and confusion the race has moved onward; every triumph heralded by uproar, every consummation wrought in fire. The smoke of battle has been the pillar of cloud. God's will has been proclaimed by the strongest cannon. Every great event has been born of chaos, every gift been bought with blood. Marathon gave us the artist; Pharsalia, the emperor; Tours, the Christian thinker; Hastings, the man of manners;—but all the while Enceladus lay enchained, and still Etna belched fire. Thrones were consumed, empires blotted out, civilizations wrecked, and amid the universal ruin the nations stood in sorrow, waiting for the end.

But in God's dramas the final acts are always glorious. When Edward I. was king, a spark was seen; it was a blaze under Charles I.; there

was the gleam of a sword at Bunker Hill, a murder shriek in the streets of Paris, a rocket of fire across the sky, and under its light there appeared a new earth, a new throne, a new king. As at the close of geologic times, amid the melting icebergs, a kingly form appeared, ruler, thenceforth, of the lands and the seas; so now, as the forms of old civilizations are passing away, a new monarch has come, ruler not only of nature but sovereign of the kingdoms of men:—he is the common man. Looking into his face, as he stands before us, the problem of the past is solved. Now we know why the world has advanced so slowly. It is because we have been selfish. It is because, wrapped in our robes of purple and pride, we have always thanked heaven we are not as *other* men are. It is because we have tried to lift the heavy wheels of progress over the granite table of the law, thrown down from Heaven to be true forever, and stamped with the handwriting of the eternal God, *Honor thy neighbor!* Slowly do we learn, even when taught by Heaven. Odin dwelt in a fisherman's hut; Apollo lodged with simple shepherds; Jove visited the poor Ethiopians; Jesus walked with publicans and sinners; while we, greater than the gods, have stalked the earth, lost in ourselves, uncaring for the man who toils, the man who serves, the man who sorrows, and noticing him only to curse him as he has staggered and whirled in the mad dance of death.

But in this universe all things are bound together. Not a star can fall but other stars totter; not a stream can cease to flow but the ocean feels it; not a child can cry but the world's heart is sadder; not a beggar on his bed of straw can die from injustice or wrong, but his dying breath tarnishes the gold in the crown of the king. Man lives by association. Each is bound to all. Keep the sun in his place in heaven unsupported by other suns, before you dream of building a permanent civilization upon distinction and caste, or of seeing one nation pass into the golden age without answering the question which has been sounding from the beginning of the world—"Where is thy brother?" *Humanity is one.* That is the open secret of history. Doomed are all who will not read it. Call it chance, call it fate, call it God, there is an inflexible course of things; and if men choose not the right because it is right, they are scourged into duty by the scorpion whips of nature's laws. Over our pride and over our hate, in opposition to our prayers, and conquering our strength, the tides have flowed, bringing the bark of the *common man*. He is here. By gunpowder, which blew down the walls of feudal lords, he is here. By the printing press, which first told all hearts beat alike, he is here. By the crusades, which led prince and peasant hand in hand, he is here. By the steamship, which made the continents one, he is here. By all the inventions of genius, the discoveries of science, the widening generalizations of philosophy, the teachings of the immortal men who have stood beside the burning bush, he is here. By the agony of prayer from garret and cellar; by the wasted souls that have cried as they left us, "I was naked and ye clothed me not;" by the countless millions that have gone up to Heaven, transfigured in battle-fire, he is here. By the will of God he is here—he is here. Here to tell the tale of toil—the only epic of this world. You may call him ignorant, wise men; you may call him blind, clear-sighted men; you may call him brutish, cultured men; but do not

call him lazy. Lazy? Hasn't he taken this planet, scathed and scarred by fire and ice, and planted it with flowers and circled it with homes? Hasn't he gone out upon the ocean when it was wild there, and out into the desert when Death was there, and clambered over the ruggedest heights, and fathomed the poisonous caves of the sea? Hasn't he toiled in quarry and mine that cities might have golden gates, in factory and by flaming forge that the world might be clothed, though the threads of his own life were consumed in the weaving? Hasn't he taken the mountains by their eternal locks of white and hurled them into the chasms to bear up the heavy wheels of trade, and hasn't he gone down upon the beach and with brawny arm pushed almighty Neptune back into his watery home? Lazy! Hasn't he walked in weary pilgrimage across continents of burning sand, and wrestled all night with the angel that would neither bless nor console? And hasn't he reared temples of marble and pillars of gold, till his arms being weary and his heart faint, in the shadow of the magnificence his devotion created, he fell, whispering, "God is God!" Here is the world's devotion—here the world's courage. It was he who at Thermopylæ said, "Go, tell my countrymen I lie here at their command." It was he who at Waterloo, in the last desperate charge, marched into the twilight, shouting, while the sun of Austerlitz went down, "*Vive l'Empereur!*" It was he who at Vicksburg and Mission Ridge, Antietam and Gettysburg, with visions of home before his eyes, and faces he loved in his heart, marched on to the bayonet, right on to the death, singing, "The Union Forever." Fighting all the world's battles, bearing all its burdens, achieving all its triumphs, yet despised and cursed and spit upon; beaten, and plundered and slaughtered; scourged, and crushed and crucified; buried under mountainous weight of chains and unimaginable guilt of priests and kings—no wonder the centuries have gone down in night; no wonder men have said, "There is no God."

But only philosophers say that. The common man has never said it. In every land and time his "feeble hands and helpless, groping blindly in the darkness, have touched God's right hand in that darkness, and been lifted up and strengthened." Over the cottage door the flowers grew, praying, "Wait awhile;" and the brook, hastening with its burden to the sea, murmured, "Wait awhile;" and the wind in its wanderings over mountain and moor whispered through the chinks in the wall, "Wait awhile." And he waited—oh how long! "God does not pay at the end of every week, but he PAYS." He always keeps his promises. The slave is free, the toiler is king, the common man is here. By "many a frozen, many a fiery Alp" he has come, with conquering strength in his arms and heart. What will you do with him, Statesman? for he will never go back. He is standing in front of the palace of the Czar, and though Siberian caverns yawn and gape, with unblenched cheek he shouts it: "Never." Bismarck hears it and repeats it again and again, for he knows it is true: Never! France hears it and dares not contradict it, lest demons tell it again, as once they told it in her barricaded streets—Never! Even the British lion forgets how to roar, as that terrible word comes like a knell from the caves of the Emerald Isle. 'Tis fearfully true, the race moves onward. "There are no footprints backward." De Tocque-

ville wrote universal experience when he said: "After each concession democracy grows stronger and its demands increase with its strength." Let Rome be witness. Her patricians wanted peace, and admitted the plebeians into the citadel *Jus Honorum*; but step by step, and year by year, from Lucius Sextius through Sulla down to Caracalla, it was triumphantly fought till the wide Roman world found regulation and place within the Imperial city. Then comes peace. With peace came reflection; and reflection killed Rome. The hideous spectre of herself was more than the demons of war. Her robes were ermine, but her heart was unclean. Her common citizen was strong in an army, but he was not strong in himself. He was a thing, not a man. And God drove him from Italy to learn of the barbarians that he had a soul, drove him to England to fight for *Magna Charta*, brought him to America to write the Declaration of Independence, and to build a civilization, the first in history, upon personal duty and individual rights. It is the glory of to-day—each man stands by himself; thinks for himself, works for himself, and, if necessary, will fight for himself. And that is why England watches his face as he works in her Manchester shops; that is why we anxiously count his pulse as he sleeps in the slums of the city. He is restless, he is peevish, he is grasping for the stars—foolish thing to do, you say, but it keeps our eyes turned upward. He is grasping for wealth; let him grasp! Dives will be an honest man, and more liberal with his crumbs. He is boasting of his knowledge; let him boast! Babbling brooks are always shallow, and nations strand in water which is not deep. Thank God! "*A little* learning is a dangerous thing," and governments are finding it out. He is discussing theories of state and questioning holy mysteries. Let him go on. The institutions of the common mind outstrip the sluggish reason of philosopher and priest. Universal brotherhood was applauded by the mob of Rome before it was taught in her philosophy; freedom was played on the English stage before it found place in the dreams of her statesmen; emancipation was decreed in our streets before it was written at the Capitol. Truly spoke the Frenchman: "The instinct of the people is the finger of God, pointing toward eternal right." Under that guidance we have come across the years, out of the darkness into the light. Gone is the time when king can toss this planet to king, and laugh because it rattles with the bones of murdered men. Gone is the time when a nation's glory is measured by its columns of stone, or by the gold spread over its domes. Gone is the time when Despotism can lean on the arm of Faith—gone the time when kings and priests can buy the people's birthright on earth for the promise of a heritage beyond the skies. The age of humanity has come. The "dazzling, pensive dream of ages" has come true. "We are ancients of the earth, and in the morning of the times." Out of the sea the sun is rising; but Memnon's music does not greet his coming, for the steeples of a new civilization have risen, and their bells are chiming, not the triumphs of warriors and kings, but the tidings that the nations have heard the commandment: "Whom I honor, do not thou dishonor."

THE NATIONAL MIND.

BY HORACE S. FISKE, BELOIT COLLEGE, CLASS OF '82.

Assimilation is the problem of the ages, the problem of nature, of man, of God himself; the race and its fighting families have wrought for its solution; the splendor of the grass, the glory of the flower, are but a living solution in terms of beauty; the human being, physiologically, mentally, politically, socially, is an embodied problem of organic change; unto and into himself by the invisible hands of providential forces the Creator is drawing the creature. But while nature in its rose and oak, in its bird and beast and physical man, is ever successful; while the first great cause is moulding all secondary causes, the product of nature and the primal cause, man, still stands amazed before the complexities and vast conditions of the enigma. The solemn eyes of the Sphinx stare him out of countenance. The mystery of assimilation seems as hard, as impenetrable as the stony stare itself. The materialistic Persian looked and listened, till dissolution took hold of his loose organism; the embalming Egyptian bent his ear to catch some hint of desired perpetuity, but no hint fell from the stone lips, and priesthood and kingcraft were flung to as barren an eternity as the sands of their environment; the chosen Hebrew thought he heard from the dumb lips the oracular utterance: isolation is preservation, it will make you as the sands of the sea in number and as the stars of heaven for multitude; and up about himself he threw the barriers of exclusiveness and spiritless ritualism, which barred the ingress of humanitarian ideas, but not the avenging sword of Titus. The Delphic Apollo, in poetic ambiguity, led on Greek ambition to the severance of the ties of common blood, interest and religion, till it fell struggling out of sight in the pitfall prepared by Roman foresight and Roman subtlety. The world's queen on her seven-hilled throne, watched the pregnant flight of birds and the fatalistic curvings of divination, only to see her scepter depart and her expansive empire resolve itself into its unassimilated constituents, her cities breaking the artificial bond that for centuries bound them in an apparent organism. The Roman eagles flew, but they never returned. Feudalistic force died of self-struggle, unorganized elements combating to the death. Papal power could not commingle matter and spirit, and its temporal authority became a shadow and a dream. Venetian republicanism divided and subdivided until, in its aristocratic and democratic classes, it was but a house divided against itself. Gallic growth has been irregular and abnormal, because the soil and air and light of French nobility and people have not so combined as to develop the tree of national unity. Nay, the proportions of the combination have at times been such as threatened not only red republicanism, but black atheism, in which might germinate the seeds of annulling anarchy. For a century has Celt and Saxon clash been heard in deadly diversity, and the land and the law are still in their desperate wrestle. The attempted Union is not complete. The elements have not affinity; the explosion is periodic, and sometimes terrific. And now before this nation's eye looms the gray outline of this same Sphinx of assimilation; and as it mutely asks: what can *you* do with me? we must also ask: with what shall we attempt the problem? If there rise to the lips the self-answer: the national mind, whence springs it, what is it, whither does it tend?

Back of the silent swingings of the stars is an adjusting mind; back of time is eternity with her evolving order; back of the luminous face is the illuminating intelligence; back of words are, or ought to be, ideas; and back of and interpenetrating all its external history and manners, all its institutions, literature and laws, lives and moves the American mind. In these it finds tangible, perhaps permanent, expression; yet they are but reflected phases, model thoughts, ideal embodiments, while the individual and pre-eminently the great and successful individual, is more than a reflection, more than a mode, more than an embodiment; he is a part, living, and wrought into the national whole; as such he may disclose the essential virtues, or powers, or tendencies of the American mind, as the country's father exhibits to an emulative world the beauty of control, the force of energy, the serenity of strength, and the golden lesson of a clean morality. And the seed in which lay wrapped the character and purpose of the American mind was the individual,—the individual who two centuries and a half ago was cut in the face by the cold spray of the Atlantic, the much-praised, much-blamed, yet ever the same, Puritan pilgrim, whose religion was so sternly strict, even to the exclusion of his differing neighbor; whose inworking and outworking force was unmastered, cleaving circumstances as did his boat the waves; whose character, from its own height was intolerant of lower lives; whose practicality, both from mental drift and circumstantial influence, was so intense, as still to be the dominant, pervasive, impulsive force in the American mind; whose political ideas as applied to constructive and actual government were so pregnant, lasting and powerful as to find no European peers, and to lay through the hands of "the fathers" the foundation-stones of the rising strength of the republic. Political liberalism, step by step, undermined religious dogmatism; and the national mind widened its borders, growing receptive, appreciative and kind. Its generosity begot a more sensitive impressibility, which looked about, was struck with new thoughts and brightened with the phases of new movements, took unto itself as foster-children even antagonistic forces, ambitious to make the issue out of good and evil, good. With the primitive energy of the pilgrim and the impressibility of "the fathers," the American mind grew at the same time into the most aggressive and the most hospitable, the most cautious yet the most receptive of minds, peculiarly practical and intensely democratic, not given to philosophizings, but firm in grasp, and bold in its interpretation, of principles, conservative yet composite.

"Here about the beach it wandered, nourishing a youth sublime,
With the fairy tales of science, and the long result of Time;"

for, unlike the steps in historical precedence, the American mind was scientific before it was artistic. The hand of circumstance led it to the foot of the mountain and its majesty, to the bank of the mysteriously moving river, down forest aisles, whispering not so much palpable peace and secure eternity of the woods, as a settler's home, unhewn as yet from the leafy quarry. Mountain, river, wood, spoke the language of physical possibility—simple Saxon, unmixed with French sentiment or Italian romance, yet breathing still an unconscious epic to the Puritan soul.

Not on parchment wrote the American Homer and the Western Virgil; on the tablet of life they wrote, and not the wanderings of wily Greek or

pious Trojan, but those of the honest human soul over a white-capped waste of waters, in quest of an Ithaca of free religion and a Rome of untrammelled conscience. They wrote the battlings of political liberality with ecclesiastical closeness, of stern mind with stern matter, of freedom with servility. For while the American pioneer mind walked wonderingly through the paths of physical inquiry, it kept its hold on principles—principles embodied in the declaration of '76 and defended by the shot heard round the world. Then, on the granite of freedom and equality, the nation's mind lifted the shining columns and stainless dome of the constitution. These hundred years have they stood; for into those columns and into that symmetry of dome were wrought the calm capacity, the disinterested foresight of Hamilton and Madison, of Franklin and Washington. But while this mind of the nation was thus comprehensive of fact and fundamental law, the foundation principle of man's equality, as before the law and under the government, failed of its integrity, in the constitutional recognition of human enslavement; the Southern element in the American mind grew into a living conviction of the right and need of human chattlehood. Weakened at its base the rising structure trembled; through fratricidal years it swayed; the fall and crash seemed imminent. But into the shaking constitution the nation's will built the buttresses of negro freedom, citizenship and suffrage. Thus just and true the principles of the American mind prove impregnable before the canonade and fierce attack of sectional or selfish passion.

Yet will its primitive purity of political thought, its widening tolerance, its wakened receptivity, its almost inherited morality, save it from danger sounding ahead, from Scylla and Charybdis vying for the shattering or whelming of this voyaging mind of the nation, from Æolian winds, impatient to drive against the barricaded beach of money, where bleach the bones of mercenary peoples? An aristocracy whose boast is not blood, nor brains, but bullion, is the summit of commercial ambition; when his feet are planted there, Lucre, from the top of his achievement, looks abroad over the valleys of moderate acquisition with something like contempt in his eye and contemptuousness on his lip. Social inequality on the fictitious basis of money is the prophet of class collision and of national disruption. But has not the race for a golden goal, as runners, not only the few but the many, even the most? Does not the brightness of the American mind tarnish with monetary contact? May not this national mind sink its large capacities in sordidness? To literary genius, scientific aptitude and the aspirations of art the stream of national life should be clear and sweet. But our dead Longfellow could not draw thence, he could only pour into its turbidness the sweetness and purity of his song. America's poets have inspired, rather than been inspired by, the American mind. They sprang not from it, as Homer from the Greek, and Virgil from the Roman, mind, or as Goethe from the German, and Shakspeare from the English. Poetry breathes not a gainful air. The invincible will, the far-seeing, swift-thinking intellect, the reason unconscious in its logic, the sensibilities acutely alive, the imagination that wings its way from mart to mart, from continent to continent,—these are the faculties of the merchant mind; consider an upward impulse. Would there be no ripe fruit in literature, no exact thought in science, no breathing

masterpieces in marble and color? On this splendid eminence, where gathers the focus of history, might not the American mind draw forth a spectrum of beauty, and through the alembic of native genius flash upon the canvas madonnian halos, upon the paths of searching science a dry inductive light, upon the crystals of poetry the brilliancy of dew?

Remembering the characteristics of this national mind,—its marvelous energy, growingly assisted by creative genius, charitable, hospitable, impressible, yet grasping grandly the ultimate truths in government, thought and religion, its morality genuine, its religion still healthily Christian, its feelings warm, humanitarian, yet not emotional, its intellect swift, cool, balanced, its will forceful in direction, stern in command, iron in composition,—remembering these, may we not look once more at the stone-eyed Sphinx of assimilation; extend to Celt and Saxon, to Jew and German the hand of fellowship. May we not dare to look into the black face, and the red face, yes, into the Orient yellow face itself, without blanching, and say: bring us a receptive attitude with the willing power of homogeneity, and not the dregs and scourgings of your life, and we will assimilate you by the energies and forces of the American mind, acting along the lines of local self-government, personal property, an intelligent press, a universal school, an elevating religion?

Broadening in its scope, deepening its hold on principles, lifting its practical trend to a higher level, a less sordid aim, maintaining the standard of its robust morality, and relying on the fatherhood of God to complete the brotherhood of man, may the American mind, as the cherished child of destiny, go down the pathway of broadening opportunity, gathering here the fruit of pure thought, there the flower of sentiment, here with the song of poetry upon its lips, there with a word of warmth to kindred minds, offering to the Greek, beauty, to the Roman, will, to the German, music and philosophy, to the Celt, vivacity and impulse, and to all the world, the blessings of peace and purity, intelligence and hope.

NATIONAL EDUCATIONAL ASSOCIATION.

The next annual meeting will be held at Saratoga Springs, N. Y., July 5 to 11, 1883.

The 21st annual meeting of this body was held at Saratoga Springs, New York, July 12 and 14, 1882. The Association was called to order by its President, Hon. Gustavus J. Orr, of Atlanta, Georgia, who spoke feelingly of the departure of sectional animosities, of the truly national character of the Association, with its programme furnished by nineteen different States, and of the wide range of its work. President Tappan, of Kenyon College, Ohio, followed with a paper on "The University; Its Place and Work in the American System of Education;" and President Jeffers, of Westminster College, Pennsylvania, with one on "Self-Consciousness in Education." At the afternoon session Hon. J. W. Patterson, Superintendent of Public Instruction in New Hampshire, offered a resolution, which was unanimously passed, urging Congress to make liberal appropriations for the support of education, to be distributed among the States on the basis of illiteracy. Hon. Jas. P. Slade, of Illinois, read a paper on "Country Schools." At the evening session Hon.

Samuel Barnett, of Washington, Georgia, delivered an address on "The Foundation Principles of Education by the State."

On the second day T. W. Bicknell, of Boston, read a report as to the establishing of the new department, known as the National Council of Education, which is intended for the more mature and philosophic consideration of educational problems. President W. W. Folwell, of the University of Minnesota, read a paper on the "Secularization of Education;" President J. H. Carlisle, of Wofford College, South Carolina, one on "The Prize System as an Incentive to College Students," and Prof. Brown, of Tufts College, Massachusetts, one on "The Delsarte System of Expression."

Resolutions were adopted in memory of W. D. Henkle and S. H. White.

THE DEPARTMENT OF HIGHER INSTRUCTION

met July 14, listened to and discussed addresses by Prof. Wright, of Dartmouth College, on "The Place of Original Research in a College Education;" and by Prof. Glenn, of Jefferson, Georgia, on "Man, the Machine, or Man the Inventor; Which?"

THE DEPARTMENT OF SUPERINTENDENCE

held its principal meeting at Washington, March 21, 22 and 23, presided over by Hon. T. B. Stockwell, State Commissioner of Schools, Rhode Island. Resolutions were passed and committees appointed to urge upon Congress the necessity of making appropriations for the aid of education in the various States. A paper was read by John S. Billings, U. S. A. Surgeon, on "The Information Necessary to Determine the Merits of the Heating and Ventilation of a School Building;" by Dr. Charles Smart, U. S. A., on "The Chemical Examination of Air as Applied to Questions of Ventilation;" by Supt. H. S. Jones, of Erie, Pennsylvania, on "Obstacles in the Way of Better Primary Education;" by Prof. G. S. Hall, Harvard College, on "Chairs of Pedagogy in our Higher Institutions." An address was made by Rev. Sheldon Jackson, D.D., on "The Neglect of Education in Alaska;" a paper read by Supt. Godding, of Government Insane Hospital, on "A Word with Teachers from My Standpoint;" also a paper by Dr. J. M. Gregory, Champaign, Illinois, on "Some Fundamental Inquiries Concerning the Common School Studies." A paper was sent in by Dr. W. T. Harris, Concord, Massachusetts, on "How to Improve the Qualifications of Teachers." At the Saratoga meeting this department merely elected officers.

THE DEPARTMENT OF INDUSTRIAL EDUCATION

heard and discussed a paper by President George T. Fairchild, of Kansas State Agricultural College, on "Dexterity Before Skill;" one by Prof. C. M. Woodward, of Washington University, St. Louis, on "The Function of a Manual Training School;" and one by President E. E. White, of Purdue University, Lafayette, Indiana, on "The National Industrial College: Its History, Work and Ethics."

DEPARTMENT OF NORMAL SCHOOLS.

The President, C. C. Rounds, of Maine State Normal School, delivered an address on "Needed Changes in the Organization and Work of the Normal School." A paper was read by Hon. D. L. Kiehle, State Superintendent of Minnesota, on "The True Place of the Normal School in the Educational System."

DEPARTMENT OF ELEMENTARY SCHOOLS.

The President, Hon. John M. Bloss, State Superintendent of Indiana, delivered an admirable inaugural, in which he set forth the need of educating children with the idea that they must *earn* their living—not merely trying to live by their wits. A paper was read by President Geo. P. Brown, of Indiana State Normal School, Terre Haute, on "The Relation of Memory to Elementary Education;" and one by Miss Carrie B. Sharpe, of Ft. Wayne, Indiana, on "What, How, and How Better."

OFFICERS FOR 1882-3.

GENERAL ASSOCIATION.

| | |
|---------------------------------------|------------------------------|
| ELI T. TAPPAN, Gambier, Ohio..... | <i>President.</i> |
| JOHN W. DICKINSON, Boston, Mass..... | <i>First Vice-President.</i> |
| WILLIAM E. SHELDON, Boston, Mass..... | <i>Secretary.</i> |
| N. A. CALKINS, New York City..... | <i>Treasurer.</i> |

COUNCIL OF EDUCATION.

| | |
|---------------------------------------|------------------------|
| THOMAS W. BICKNELL, Boston, Mass..... | <i>President.</i> |
| EMERSON E. WHITE, Lafayette, Ind..... | <i>Vice-President.</i> |
| C. C. ROUNDS, Farmington, Maine..... | <i>Secretary.</i> |

CONSTITUTION.

PREAMBLE.

To elevate the character and advance the interests of the profession of teaching, and to promote the cause of popular education in the United States, we, whose names are subjoined, agree to adopt the following

CONSTITUTION.

[As Amended July 13 and 16, 1880.]

ARTICLE I.—NAME.—This Association shall be styled the National Educational Association.

ARTICLE II.—DEPARTMENTS.—SECTION 1. It shall consist of five departments: the first, of School Superintendence; the second, of Normal Schools; the third of Elementary Schools; and the fourth, of Higher Instruction; and the fifth of Industrial Education and a National Council of Education.

SEC. 2. Other departments may be organized in the manner prescribed in this Constitution.

ARTICLE III.—MEMBERSHIP.—SEC. 1. Any person in any way connected with the work of education shall be eligible to membership. Such person may become a member of this Association by paying two dollars and signing this Constitution; and he may continue a member by the payment of an annual fee of two dollars. On his neglect to pay such fee, his membership will cease.

SEC. 2. Each department may prescribe its own conditions of membership, provided that no person be admitted to such membership who is not a member of the general Association.

SEC. 3. Any person eligible to membership may become a life-member by paying at once twenty dollars.

ARTICLE IV.—OFFICERS.—SECTION 1. The officers of this Association shall be a President, twelve Vice-Presidents, a Secretary, a Treasurer, one Counselor for each State, District or Territory represented in the Association, and the officers charged with the administration of their respective departments. Any friend of education may become a life-director by the donation of one hundred dollars to the Association at one time, either by himself or on his behalf; and any educational association may secure a perpetual directorship by a like donation of one hundred dollars, the director to be appointed annually or for life.

SEC. 2. The President, Vice-Presidents, Secretary, Treasurer, Counselors, Life-Directors, and presiding officers of their respective departments shall constitute the Board of Directors, and, as such, shall have power to appoint such committees from their own number as they shall deem expedient.

SEC. 3. The elective officers of the Association shall be chosen by ballot, unless otherwise ordered, on the second day of each annual session, a majority of the votes cast being necessary for a choice. They shall continue in office until the close of the annual session subsequent to their election, and until their successors are chosen.

SEC. 4. Each department shall be administered by a President, Vice-

President, Secretary, and such other officers as it shall deem necessary to conduct its affairs.

SEC. 5. The President shall preside at all meetings of the Association and of the Board of Directors, and shall perform the duties usually devolving upon a presiding officer. In his absence, the first Vice-President in order who is present shall preside; and in the absence of all Vice-Presidents, a *pro tempore* chairman shall be appointed on nomination, the Secretary putting the question.

SEC. 6. The Secretary shall keep a full and accurate report of the proceedings of the general meetings of the Association and all meetings of the Board of Directors, and shall conduct such correspondence as the Directors may assign, and shall have his records present at all meetings of the Association and of the Board of Directors. The Secretary of each department shall, in addition to performing the duties usually pertaining to his office, keep a list of the members of his department.

SEC. 7. The Treasurer shall receive and hold in safe keeping all moneys paid to the Association, shall expend the same only upon the order of the Committee of Finance, shall keep an exact account of his receipts and expenditures, with vouchers for the latter, which accounts he shall render to the Board of Directors prior to each regular meeting of the Association, and shall also present an abstract thereof to the Association. He shall give bond for the faithful discharge of his duties as may be required by the Board of Directors.

SEC. 8. The Board of Directors shall have power to fill all vacancies in their own body, shall have in charge the general interests of the Association, shall make all necessary arrangements for its meetings, and shall do all in its power to make it a useful and honorable institution. Upon the written application of twenty members of the Association for permission to establish a new department, they may grant such permission. Such new department shall in all respects be entitled to the same rights and privileges as the others. The formation of such department shall in effect be a sufficient amendment to this Constitution for the insertion of its name in Article II, and the Secretary shall make the necessary alterations.

SEC. 9. The Board of Directors shall appoint three Trustees, into whose hands shall be placed for safe keeping and investment all funds which the Association may receive from the creation of life-directorships, or from donations, unless the donors shall specify other purposes for which they may be used. The income of such funds so invested shall be used exclusively in defraying the expense of publishing the annual volume of the Association, unless the donors shall specify otherwise. The Board of Directors shall require such Trustees to give to the Association their joint bond in a sum equal to twice the amount of such trust fund as may be in their hands.

ARTICLE V.—MEETINGS.—SECTION 1. The annual meeting of the Association shall be held at such time and place as shall be determined by the Board of Directors.

SEC. 2. Special meetings may be called by the President at the request of five directors.

SEC. 3. Any department of the Association may hold a special meeting at such time and place as by its own regulations it shall appoint.

SEC. 4. The Board of Directors shall hold their regular meetings at the place, and not less than two hours before the assembling of the Association.

SEC. 5. Special meetings may be held at such other times and places as the Board or the President shall determine.

SEC. 6. Each new Board shall organize on the day of its election. At its first meeting a Committee on Publication shall be appointed, which shall consist of the Secretary of the Association for the previous year, and one member from each department.

ARTICLE VI.—BY-LAWS.—By-Laws, not inconsistent with this Constitution, may be adopted by a two-thirds vote of the Association.

ARTICLE VII.—AMENDMENTS.—This Constitution may be altered or amended at a regular meeting by the unanimous vote of the members present, or by a two-thirds vote of the members present, provided that the alteration or amendment has been substantially proposed in writing at a previous meeting.

BY-LAWS.

1. At each regular meeting of the Association there shall be appointed a Committee on Nominations, one on Honorary Members, and one on Resolutions.

2. The President, First Vice-President and Secretary shall constitute a Committee on Finance.

3. Each paying member of the Association shall be entitled to a copy of its Proceedings.

4. No paper, lecture, or address shall be read before the Association or any of its departments in the absence of its author, nor shall any such paper, lecture, or address be published in the volume of Proceedings without the consent of the Association in each case.

AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.

This body held its thirty-first annual meeting at Montreal, August 23, 24, 25, 26, 28, 29, 30, 1882. Principal J. W. Dawson, of McGill College, Montreal, presided over the proceedings, which were very interesting. The attendance was unusually large, 923 arrivals being registered.

The thirty-second annual meeting will be held at Minneapolis, beginning August 15.

We give below the list of officers for this year:

OFFICERS.

PRESIDENT:

C. A. YOUNG, of Princeton, New Jersey.

VICE-PRESIDENTS: •

- A. *Mathematics and Astronomy*—W. A. Rogers, of Cambridge, Mass.
- B. *Physics*—H. A. Rowland, of Baltimore, Maryland.
- C. *Chemistry*—Edward W. Morley, of Cleveland, Ohio.
- D. *Mechanical Science*—De Volson Wood, of Hoboken, N. J.
- E. *Geology and Geography*—C. H. Hitchcock, of Hanover, N. H.
- F. *Biology*—W. J. Beal, of Lansing, Michigan.
- G. *Histology and Microscopy*—J. D. Cox, of Cincinnati, Ohio.
- H. *Anthropology*—O. T. Mason, of Washington, D. C.
- I. *Economic Science and Statistics*—F. B. Hough, Lowville, N. Y.

PERMANENT SECRETARY:

F. W. PUTNAM, of Cambridge, Massachusetts.

GENERAL SECRETARY:

J. R. EASTMAN, of Washington, D. C.

ASSISTANT GENERAL SECRETARY:

ALFRED SPRINGER, of Cincinnati, Ohio.

SECRETARIES OF THE SECTIONS:

- A. *Mathematics and Astronomy*—W. W. Johnson, Annapolis, Minn.
- B. *Physics*—C. K. Wead, Ann Arbor, Mich.
- C. *Chemistry*—J. W. Langley, Ann Arbor, Mich.
- D. *Mechanical Science*—A. J. Dubois, New Haven, Conn.
- E. *Geology and Geography*—Alexis A. Julien, New York City.
- F. *Biology*—S. A. Forbes, Normal, Ill.
- G. *Histology and Microscopy*—Carl Seiler, Philadelphia, Pa.
- H. *Anthropology*—G. H. Perkins, Burlington, Iowa.
- I. *Economic Science and Statistics*—Joseph Cummings, Evanston, Ill.

TREASURER:

WILLIAM LILLY, of Mauch Chunk, Pa.

SPELLING REFORM ASSOCIATION.

This body held its sixth annual meeting, at Harvard University, July 13, 1882. Prof. F. A. March, of Lafayette College, presided. On motion of Secretary Dewey, a graded pledge was adopted for general circulation which binds the signer to use some part, or the whole, of the revised spelling. Prof. Scott was appointed to make a list of simplified spellings, authorized by standard English dictionaries. The *FONETIC TEACHER*, published by T. R. Vickroy, St. Louis, was adopted as the official organ of the Association.

The officers for the year are: Prof. Francis A. March, President, Easton, Penn.; Melville Dewey, Secretary, Boston; T. R. Vickroy, Treasurer, St. Louis.

BIOGRAPHICAL.

JOHN EATON, LL.D.

General John Eaton is the Commissioner of the Bureau of Education, or, as the statute calls it, the "Office of Education" in the Interior Department, Washington, D. C. This bureau was established by Congress in 1867, at the request of the educational workers of the United States. Its function is solely to "collect such statistics and facts as shall show the condition and progress of education," and to distribute the same in reports and circulars. It has no control over educational systems or methods. Its relation to education is the same as that of the Bureau of Statistics in the Treasury Department is to trade, commerce, and finance. General Eaton has been Commissioner since 1870. He is a native of Sutton, New Hampshire, and was graduated at Dartmouth College in 1854. He began educational work as a teacher, in his sixteenth year, as a means of paying his college expenses. On graduating, he became principal of a ward school in Cleveland. His success attracted attention, and in less than two years he was solicited to superintend the schools of the city of Toledo. He accepted the invitation, and served as superintendent until 1859, when he resigned to study for the ministry at Andover, Massachusetts. In 1861 he was ordained, and soon thereafter entered the army as chaplain of the Twenty-seventh Ohio Regiment of Volunteers. General Grant put him in charge of the freedmen in the Mississippi Valley. What should be done with the negro was an unsolved problem at that period in history. General Eaton organized them in industries, schools, and regiments. Thousands of whites, whose homes were broken up by the war, were also cared for by him. At the close of the war, by the aid of prominent men, he founded the *Post*, a Memphis daily newspaper. In 1867 he was elected superintendent of schools in Tennessee, and organized the common-school system of that State.

While in Ohio he aided in organizing the Northwestern Ohio Teachers' Association. As chairman of a committee of the State Teachers' Association he prepared the memorial to the Legislature which resulted in the establishment of the Institution for the Reformation of Juvenile Offenders, at Lancaster. His experience as a teacher in New England while in college, as superintendent in Ohio, and his observations and labors in Tennessee and the Mississippi Valley, gave him thorough insight into the needs of the public schools of the country and into the difficulties confronting the educational workers. His work as Commissioner has required his personal visitation to all parts of the country. It may be said, truthfully, that no other man is more familiar with the condition of pop-

John. Eaton

ular education and of every class and grade of educational institutions. His ten annual reports, as Commissioner, are a wonderful history of educational progress.

The great practical service of the Bureau, as an educational exchange, is gratefully acknowledged by the educators in every field. General Eaton has secured for the Bureau a large educational library and a considerable collection of educational appliances, instruments, and models of school furniture. Dartmouth conferred the degree of LL.D. upon General Eaton in 1876. At an alumni meeting at that college, a few years ago, the venerable Prof. Sanborn presented Gen. Eaton as a son of Dartmouth who had done more for education than any living man.

WILLIAM ELKANAH COLEMAN, A.M.,

STATE SUPERINTENDENT OF PUBLIC SCHOOLS OF MISSOURI.

The subject of this sketch was born in Trimble County, Kentucky, February 1, 1841, and is therefore forty-two years of age. His parents moved to Missouri and settled in Warren County, eleven miles east of Warrenton, on the old Boon's Lick Road, in September, 1841. Here William spent his boyhood and youth on the farm, having the advantages of the public school in a country district for only a few months in the year during the winter season. Like the sons of most farmers twenty years ago, he reached manhood with an ordinary common-school education.

In 1861, when just twenty years of age, Mr. Coleman enlisted in the Confederate service, where he remained until the close of the war. He served under Gen. Price, in Missouri and Arkansas, until the First Missouri Brigade was transferred to the east side of the Mississippi River. He was Ensign Sergeant of the Second Missouri Regiment, and at the battle of Altoona, October 3, 1864, he lost his left leg. When the war closed he returned to his home in Warren County and entered Jones' Commercial College, St. Louis, in September, 1865, from which institution he graduated. Early in 1866 he went to Trimble County, Kentucky, where, in April, he began his successful career as teacher. Since that time all his ability, energy, and time have been devoted to the cause of public education. He taught two and a half years in Kentucky, and then returned to his father's adopted State and taught school in Warren, Lincoln, and St. Charles counties.

Desiring to be more than a mediocre in his chosen profession, he entered the Kirksville Normal School, while it was yet a private institution. After said school had become a State institution, he graduated therefrom, receiving the honors of his class in 1873. Within four days after his graduation he was made principal of the public schools of Miami, Saline County, Mo., which position he held for two years. In 1875 he was

W. C. Coleman

elected Superintendent of the Maryville public schools, and, in 1876, took charge of the schools of Liberty, Clay County, Mo., which position he held for five years, with great satisfaction to his patrons, and much honor to himself. When the citizens of Marshall had built a fine school-house, realizing that their schools had never been properly organized, they, in 1881, selected Prof. Coleman to organize their schools. To him belongs the honor of establishing, in one year, a system of city schools at Marshall, Mo., which is surpassed by none in the State.

On July 26, 1882, the Democratic party of Missouri nominated him for the office of State Superintendent of Public Schools. His election by an overwhelming majority—running ahead of his ticket several thousand votes—is a just tribute to a faithful public servant and a deserved recognition of that profession at the head of which he stands. His motto has ever been “Talent receives its due reward and merit its just compensation.” His work for twelve years has been in the line of promotion. Few men, in such a brief period, have been promoted from a log school-house to the office of State Superintendent.

Prof. Coleman is a consistent Christian gentleman in a positive way; he believes in his religion and carries it out. His most striking characteristics are his transparent honesty, which removes from every one's mind the idea that he can act from hidden motives; and the enthusiasm with which he goes into whatever he undertakes, even in the small affairs of life. Singularly cordial and frank in his manner, there is no danger that we shall hear complaints during his term, of haughty official reserve. A devout believer in all honest efforts at education, schools of every grade, both public and private, will find in him a faithful friend and wise counselor. Pre-eminently a man of the people, he is destined to have a powerful influence in shaping good educational legislation—something which is sadly needed.

EDWARD HENRY LONG,

SUPERINTENDENT OF THE PUBLIC SCHOOLS OF ST. LOUIS.

Edward Henry Long was born in Livonia, Livingstone County, New York, October 4, 1838. Following the path trod by so many New England teachers, we find his early school life passed in the common school, and his training as a youth received in one of the excellent academies, which are the district high schools. At the age of twenty, having saved enough of the money earned in teaching district schools to defray the expenses of a more extensive literary course than he had up to this time pursued, he entered Genesee College (now Syracuse University). He remained here some time, but did not graduate. In 1867 he was engaged in the schools of Buffalo. In 1870 he was made principal of one of the St. Louis public schools; in 1874, elected Assistant Superintendent, which position he filled for six years. He was universally popular with the

•

E. A. Long.

teachers, and has rare ability for developing whatever of talent a teacher may have. In 1880 he was elected to his present position, which he has ably filled for nearly three years.

It is not the object of the present sketch to do more than give a brief account of his work as Assistant Superintendent and Superintendent of the St. Louis Public Schools. The first vigorous work of Mr. Long was felt in the improved reading of the lower grades in our schools. He argued wisely that to read well a child must know words, and this knowledge could be acquired only by the teacher's careful and repeated presentation of it. Again, that the necessary emphasis and inflection must at first be an imitative act on the part of the pupil, and that the teacher must present a correct example for the pupil to follow. The mere statement of these pedagogical truths would have availed little in the process of gaining better results in this study had they not been followed up by close, critical supervision of both principals and teachers. Mr. Long gave this personal attention, and the abridgment of the amount required to be read in a year's time, with a greatly increased amount of attention to what was required, have produced results highly satisfactory, as shown in the excellent reading now obtained in our primary grades. The method of teaching arithmetic, though not entirely his, has reached its present degree of excellence through his untiring determination, that the work must be *well done* as the pupil progressed. Principals supervised teachers more closely, examined work more frequently, and graded as a matter of course more accurately. Under his administration as Superintendent much of the old course of study has been eliminated, and what has been left tends largely to that which is of the most practical benefit to the pupils. In no one thing is he as a Superintendent stronger than in this quiet control of the Board of Education, which recognizes him as a man of strong good sense, supported by an indomitable will and unflinching honesty, yielding when he can to gratify the wishes of his co-laborers, yet immovable when he feels the position he has taken is the right. Mr. Long, though young, comparatively speaking, in the work of superintending, shows marked administrative ability, and his reports give evidence of constantly developing power.

WILLIAM TORREY HARRIS, LL.D.

William Torrey Harris, LL.D., was born in North Killingly, Connecticut, September 10, 1835. He is a descendent, on his father's side, from Thomas Harris, who emigrated to Rhode Island, with its founder, Roger Williams. His mother was a descendant of William Torrey, who left England and settled in Weymouth, Massachusetts, in 1640, with his son Samuel. He was educated at a country district school in Connecticut, and attended academies at Woodstock, Connecticut, and at Andover and Worcester, Massachusetts. After teaching several terms he entered Yale College, in 1854, being then in his eighteenth year. He remained three years (leaving in 1857). He did not complete his course at Yale, but the

W. T. HARRIS, LL. D.

college subsequently conferred upon him the degree of M. A. unsolicited. As President Wolsey wrote, "In consideration of your services to the cause of education and to that of philosophy." The degree of LL. D. was afterward conferred upon him by the University of the State of Missouri.

In August, 1857, Mr. Harris arrived in St. Louis, and engaged in teaching. He became connected with the public schools of the city, in May, 1858, as assistant teacher in the Franklin School. He was appointed Principal of the Clay School—the first graded school in the city—in 1859. After eight years of service as Principal of the Clay School, in which position he gave the utmost satisfaction, he was, in 1867, appointed assistant superintendent. In May of the following year, the Board of School Directors elected him Superintendent of the St. Louis Public Schools, and he was re-elected each year, and held this important and honorable position until May, 1880. Upon assuming the responsibilities of his office, Mr. Harris immediately commenced a series of improvements in the public-school system as then taught, which have produced the most beneficial results, and which have challenged the criticism and commanded the admiration of educators everywhere.

Mr. Harris also introduced the present method of German instruction. Instead of having German taught in separate schools, it is distributed in the different schools in the city, thus removing all elements of caste or nativism. This system, which works so harmoniously and successfully in St. Louis, is now generally adopted throughout the West. Under Mr. Harris' system of classification and grading, the rigid character of the old schools has passed away, and the mobility is such that slow pupils are neither neglected nor overworked, and the apt scholars not retarded nor unduly stimulated. The method of teaching the natural sciences in the St. Louis schools is another marked feature of Mr. Harris' administration. It is so arranged as not to interfere with the other branches, having but one lesson of an hour each week. The plan is to give each pupil who passes through the grades three complete courses of instruction in natural science. Each course includes topics from the grand divisions of botany, zoology, and natural philosophy, and is so graded that the beginner is taught chiefly concerning his playthings, and the natural objects familiar to him.

On his retirement from the superintendency of the St. Louis Public Schools, Mr. Harris was the recipient of many testimonials expressive of the high esteem in which he was held by all with whom he had been connected in his educational work. Among these was a gold medal presented by the citizens of St. Louis as a token of their appreciation of his eminent services in the cause of public education there. He was also presented with a letter of credit for \$1,000 for defraying his expenses on a prospective trip to Europe to study and observe recent educational methods abroad. A beautifully engrossed copy of complimentary resolutions was presented to him by the teachers of the city, containing 1,100 signatures.

The *American Journal of Education*, speaking of the honors paid to him on his retirement, said:

"It seems a right and proper thing to do—this recognition of the eminent services of Dr. William T. Harris, on his retiring from the position of Superintendent

of the Public Schools of St. Louis—by the presentation of a gold medal and a letter of credit. Valuable and praiseworthy as these testimonials are, in and of themselves, the volume of autograph letters, and the cordial, appreciative indorsement of Dr. Harris and his work which they contain, will ever remain in the family a legacy of priceless value. Letters from statesmen, ministers, physicians, bankers, lawyers, manufacturers, merchants, railroad presidents—letters from leading citizens representing every great interest which the schools have benefited—these, after all, form a testimonial beyond price.

“What other great city, what great State has thus, voluntarily, put itself on record by the action of its representative men, with so strong an indorsement of the value of the public-school system, by honoring so conspicuously—as one letter inclosing a check to the committee from a gentleman from Maine phrased it—‘the man who has done more for the cause of universal education than any other living American?’”

At the Paris Exposition, in 1878, he was made an officer of the French Academy in recognition of his great services to education.

In 1875, at the urgent solicitation of Messrs. D. Appleton & Co., Dr. Harris commenced the preparation of the popular “Appletons’ Readers,” of which over three million copies are now in use throughout the country.

He is editor of the *Journal of Speculative Philosophy*, which, now in its seventeenth volume, has achieved a permanent and gratifying success. It is gaining ground in this country, and has won a wide and hearty recognition among the thinking men of Germany, and throughout Europe.

In 1873 he prepared for the Bureau of Education, at Washington, the “Brief Statement of the Theory of Education in the United States,” to present at the Vienna Exposition; and was distributed in large quantities at the French Exposition in Paris. He was elected President of the National Educational Association in 1875. He has prepared important papers on (a) The Course of Study from the Primary School to the College; (b) The Classification of Grading in the Public Schools; (c) Moral Education in the Public Schools.

His contributions to magazines and newspapers, and his lectures and addresses upon educational, metaphysical, scientific, and artistic themes, are numerous,
